INDEX OF SUBJECTS

A-ATPase:
Of halobacteria, comparison with V-ATPases (IHARA, ABE, SUGIMURA AND MUKOHATA) **172**, 475

Acceleration:
In *Sagitta elegans*, mechanics and kinematics (JORDAN) **163**, 119

Acetylcholine:
An inhibitory transmitter of leech heart interneurones (SCHMIDT AND CALABRESE) **171**, 329
Receptors for, on locust neuronal somata from the thoracic ganglion (BENSON) **170**, 203

***Achatina fulica*:**
Control of rhythmic buccal motor activity (YOSHIDA AND KOBAYASHI) **164**, 117

***Acheta domesticus*:**
Effect of diuretic hormone on fluid secretion by Malpighian tubules (COAST, HAYES, KAY AND CHUNG) **162**, 331
Interneurones in the maturing central nervous system (CHIBA, KÄMPER AND MURPHEY) **164**, 205

Acid:
Excretion of, by acidotic locusts (HARRISON AND PHILLIPS) **165**, 97

Acid–base balance:
In trout after exercise (TANG, LIN AND RANDALL) **169**, 235
Of trout exposed to varying salinity (WILSON AND TAYLOR) **166**, 95

Acid–base regulation:
Function of renal V-ATPase (GLUCK, NELSON, LEE, WANG, GUO, FU AND ZHANG) **172**, 219
In a toad, role of the lymphatic and circulatory systems (GARLAND AND TOEWS) **170**, 271
In rainbow trout (CURTIS AND WOOD) **173**, 181
In trout, contribution of the secondary circulatory system (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43
In unfed locusts (HARRISON, WONG AND PHILLIPS) **165**, 85; (HARRISON AND PHILLIPS) **165**, 97
Role of V-ATPase in renal epithelial proton transport (GLUCK AND NELSON) **172**, 205

Acidification:
Of intracellular compartments in phagocytic cells (GRINSTEIN, NANDA, LUKACS AND ROTSTEIN) **172**, 179
Of intracellular organelles (MELLMAN) **172**, 39
Of the fungal vacuole by V-ATPase (STEVENS) **172**, 47
Of the yeast vacuole (KANE) **172**, 93
Regulation of, in coated vesicles (FORGAC) **172**, 155
Role of V-ATPases (HARVEY) **172**, 1

Acidosis:
Recovery from, in locusts (HARRISON, WONG AND PHILLIPS) **165**, 85; (HARRISON AND PHILLIPS) **165**, 97

***Acipenser naccarii*:**
Effects of diet on responses to hypoxia (RANDALL, McKENZIE, ABRAMI, BONDIOLOTTI, NATIELLO, BRONZI, BOLIS AND AGRADI) **170**, 113

Acoustic filter:
In the sound-reception system of the bush cricket (HARTLEY AND STEPHEN) **163**, 359

Actin:
Gene expression during muscle growth in a crab (WHITELEY, TAYLOR AND EL HAJ) **167**, 277

***Actinia equina*:**
Actions of Antho-RNamide on muscle (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295

Action potential:
Time-dependent, in an identified cockroach motoneurone (HANCOX AND PITMAN) **162**, 251

Activity:
Of yeast V-ATPase (MANOLSON, PROTEAU AND JONES) **172**, 105

Adaptation:
Functional morphology of the equine hoof wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145

Adenosine:
Release of, in the brain of anoxic turtles (NILSSON AND LUTZ) **162**, 345

ADP:
Levels in trout white muscle during recovery from exercise (SCHULTE, MOYES AND HOCHACHKA) **166**, 181

Adrenaline:
Effect on blood flow to the dogfish gut (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Effect on branchial blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Effect on cardiovascular variables of antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
***β*-Adrenoceptors:**
In trout and eel erythrocytes (PERRY AND REID) **167**, 235
***Aedes aegypti*:**
Characterization of a vasodilator from saliva (RIBIERO) **165**, 73
African giant snail:
Achatina fulica, control of rhythmic buccal motor activity (YOSHIDA AND KOBAYASHI) **164**, 117
Air particle oscillation:
Detection of, in the maturing central nervous system of a cricket (CHIBA, KÄMPER AND MURPHEY) **164**, 205
Air-sac gases:
Composition of, in hypothermic pigeons (JENSEN AND BECH) **165**, 111
Airspeed:
Optimization of, by terns (WAKELING AND HODGSON) **169**, 261
Airstepping:
In chicks, kinematics (JOHNSTON AND BEKOFF) **171**, 43
Alanine:
Metabolism of, by trout hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
Aldosterone:
Effect on mitochondria-rich cells of frog skin (HARVEY) **172**, 289
Alimentary lumen:
Acid transfer to, in locusts (HARRISON, WONG AND PHILLIPS) **165**, 85
Alkalization:
Role of V-ATPases (HARVEY) **172**, 1
***Ambystoma tigrinum*:**
Lateral bending during locomotion (RITTER) **173**, 1
Role of the body axis in locomotion (FROLICH AND BIEWENER) **162**, 107
Amiloride:
Effect on ion and fluid transport in insect Malpighian tubules (MADDRELL AND O'DONNELL) **172**, 417
Amino acid:
Absorption of, by insect midgut (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Glutamate, effect on the membrane potential of a squid Schwann cell (EVANS, REALE, MERZON AND VILLEGAS) **173**, 229, 251
Transport of, by trout hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
Uptake of, by blenny embryos (KORSGAARD) **171**, 315
***γ*-Aminobutyric acid:**
Role in the stopping response of *Xenopus* embryos (BOOTHBY AND ROBERTS) **169**, 65
Ammonia:
Compartmental distribution in rainbow trout (TANG, LIN AND RANDALL) **169**, 235
Excretion by, and permeability to, of rainbow trout (WILSON AND TAYLOR) **166**, 95
Ammonium:
Excretion of, in acidotic locusts (HARRISON AND PHILLIPS) **165**, 97
Measurement of, with flexible ion-sensitive electrodes (O'DONNELL) **162**, 353
AMP deaminase:
Role in the recovery of trout white muscle from exercise (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Amphibian:
Effect of the hypoxic boundary layer on aquatic skin-breathers (FEDER AND BOOTH) **166**, 237
Lymph heart pressure, rate and flow (JONES, WENTZELL AND TOEWS) **169**, 207
***Anguilla anguilla*:**
Gas deposition into the swimbladder (PELSTER AND SCHEID) **173**, 205
Stanniocalcin secretion (HANSSEN, MAYER-GOSTAN, FLIK AND WENDELAAR BONGA) **162**, 197
***Anguilla rostrata*:**
Adrenergic responses of erythrocytes (PERRY AND REID) **167**, 235
Annelida:
Induction of spawning in the male lugworm (PACEY AND BENTLEY) **173**, 165
***Anodonta cygnea*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Anosmia:
Effect on homing performance of pigeons (SCHLUND) **164**, 171

Anoxia:
Effect on adenosine release in the turtle brain (NILSSON AND LUTZ) **162**, 345
Effect on the viability of brine shrimp embryos (CLEGG) **169**, 255
Ant:
Water loss during discontinuous ventilation (LIGHTON) **173**, 289
Antarctica:
Diving metabolism of Weddell seals (CASTELLINI, KOOYMAN AND PONGANIS) **165**, 181
Antenna:
Role in the phonotactic response of crickets (MILES, MAY, HOLBROOK AND HOY) **169**, 19
***Anthopleura elegantissima*:**
Production of oxyradicals by (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
Antifreeze proteins:
Within epithelial membranes in antarctic fish (VALERIO, KAO AND FLETCHER) **164**, 135
***Aplysia californica*:**
Modulation of siphon sensory neurones by conopressin G (MARTÍNEZ-PADRÓN, EDSTROM, WICKHAM AND LUKOWIAK) **171**, 79
***Aplysia oculifera*:**
Feeding behaviour (HURWITZ AND SUSSWEIN) **166**, 215
Apnoea:
Oxygen uptake during, by a torpid bat (SZEWCZAK AND JACKSON) **173**, 217
Apodeme complex:
Of the femoral chordotonal organ of the metathoracic leg of a locust (SHELTON, STEPHEN, SCOTT AND TINDALL) **163**, 345
***Aptenodytes forsteri*:**
Diving performance (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LEMAHO) **165**, 161
Aquatic locomotion:
Role of the body axis in a salamander (FROLICH AND BIEWENER) **162**, 107
Arachnid:
Muscle firing patterns during locomotion (SHULTZ) **162**, 313
Archaebacteria:
Structure of V-ATPase (GOGARTEN, STARKE, KIBAK, FISHMANN AND TAIZ) **172**, 137
Arctic charr:
Effects of stress and starvation on brain serotonin (WINBERG, NILSSON AND OLSÉN) **165**, 229
***Arenicola marina*:**
Induction of spawning (PACEY AND BENTLEY) **173**, 165
***Artemia franciscana*:**
Effect of anoxia on the viability of encysted embryos (CLEGG) **169**, 255
Translational control in dormancy (HOFMANN AND HAND) **164**, 103
Arthropod:
Muscle firing patterns in walking arachnids (SHULTZ) **162**, 313
***Ascaris suum*:**
Voltage-activated currents in somatic muscle (MARTIN, THORN, GRATION AND HARROW) **173**, 75
Aspartate:
Effect on membrane conductance of lobster motoneurones (HASHEMZADEH-GARGARI AND FRESCHI) **169**, 53
Assembly:
Of V-ATPase in yeast (KANE) **172**, 93
***Astacus leptodactylus*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
***Asthenosoma ijimai*:**
Muscle contraction (TSUCHIYA, OBINATA, SATO, MORI, SUZUKI AND AMEMIYA) **162**, 361
Asymmetry:
Of claws, in the lobster, development of (GOVIND AND PEARCE) **171**, 149
Of Na^+/Ca^{2+} exchange across membrane vesicles from fish enterocytes (SCHOENMAKERS AND FLIK) **168**, 151
ATP:
Concentration in trout white muscle during recovery from exercise (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Levels of, in the brain of anoxic turtles (NILSSON AND LUTZ) **162**, 345
ATP synthase:
In halobacteria, comparison with V-ATPase (IHARA, ABE, SUGIMURA AND MUKOHATA) **172**, 475
In plants (MCCARTY) **172**, 431
Structure and regulation of, in *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Avoidance:
Of objects by flying locusts (ROBERTSON AND REYE) **163**, 231
Axial motor programmes:
In swimming and walking salamanders (FROLICH AND BIEWENER) **162**, 107

Axoplasmic transport:
Of screening pigment in frog and crayfish (MONDRAGÓN AND FRIXIONE) **166**, 197
***Aythya americana*:**
Blood flow distribution during diving (STEPHENSON AND JONES) **166**, 285
***Aythya fuligula*:**
Cardiovascular changes during voluntary diving (BEVAN AND BUTLER) **168**, 199
Effect of temperature on diving (BEVAN AND BUTLER) **163**, 139
Heart rate and oxygen consumption during diving (BEVAN, KEIJER AND BUTLER) **162**, 91

***Bacillus thuringiensis*:**
Insecticidal toxin (WOLFERSBERGER) **172**, 377
Baroreceptor:
Controlling haemolymph pressure in a mangrove crab (WILKENS AND YOUNG) **163**, 297
Basal lamina:
Degenerative changes in the muscle fibres during metamorphosis (RHEUBEN) **167**, 91
Basolateral plasma membrane:
From fish enterocytes, Na^+/Ca^{2+} exchange (SCHOENMAKERS AND FLIK) **168**, 151
Bat:
Apnoeic oxygen uptake (SZEWCZAK AND JACKSON) **173**, 217
Ultrasonic vocalizations (LANCASTER, KEATING AND HENSON) **173**, 43
Beagle:
Na^+/Ca^{2+} exchangers in erythrocyte membrane (SCHOENMAKERS AND FLIK) **168**, 151
Behaviour:
Adaptation of *Aplysia oculifera* to food of different sizes (HURWITZ AND SUSSWEIN) **166**, 215
Dietary selection by larvae of *Spodoptera littoralis* (SIMMONDS, SIMPSON AND BLANEY) **162**, 73
Effect of temperature on diving in ducks (BEVAN AND BUTLER) **163**, 139
Escape response of crickets (GRAS AND HÖRNER) **171**, 189
Perception of the visual flow field by flying locusts (BAADER, SCHÄFER AND ROWELL) **165**, 137
Responses of a crayfish to light (FERNÁNDEZ-DE-MIGUEL AND ARÉCHIGA) **164**, 153
Bending:
Forces in marlin intervertebral joints (LONG) **162**, 131
Lateral, in lizards during locomotion (RITTER) **173**, 1
Bicuculline methiodide:
Effect on neurotransmission in the leech heart (SCHMIDT AND CALABRESE) **171**, 329
Biochemistry:
Of squid muscle (KIER AND SCHACHAT) **168**, 41
Biological control:
Of insects (WOLFERSBERGER) **172**, 377
Biomechanics:
Exercise-induced remodelling of mature bone (LOITZ AND ZERNICKE) **170**, 1
Water circulation in the lung of the soldier crab (MAITLAND AND MAITLAND) **163**, 333
Bird:
Gliding flight of a hawk (TUCKER) **165**, 21
Profile drag of a hawk's wing (PENNYCUICK, HEINE, KIRKPATRICK AND FULLER) **165**, 1
***Blattella germanica*:**
Paternal nitrogen investment (MULLINS, KEIL AND WHITE) **162**, 55
Blenny:
Uptake and metabolism of amino acids by embryos (KORSGAARD) **171**, 315
Blood:
Gas transport by, in the lamprey (TUFTS, BAGATTO AND CAMERON) **169**, 105
Transport of gases in lamprey (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
Blood flow:
Distribution of, in the tufted duck during swimming and diving (BEVAN AND BUTLER) **168**, 199
Pulmonary, regulation of, in a mangrove crab (WILKENS AND YOUNG) **163**, 297
To the eel swimbladder, effect on gas deposition (PELSTER AND SCHEID) **173**, 205
Blood pressure:
Of antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
Regulation of, in a mangrove crab (WILKENS AND YOUNG) **163**, 297
Bluegill:
Friction drag and inertial drag in undulatory swimming (WEBB) **162**, 157
Blue marlin:
Forces in intervertebral joints (LONG) **162**, 131
Swimming speed and depth (BLOCK, BOOTH AND CAREY) **166**, 267

Body size:
Effect on muscle power output of swimming cod (ANDERSON AND JOHNSTON) **170**, 143
Body temperature:
Regulation of, in a quail (ZERBA AND WALSBERG) **171**, 409
Bohr effect:
In lamprey red blood cells (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
Bone:
Exercise-induced remodelling (LOITZ AND ZERNICKE) **170**, 1
Boundary layer:
Hypoxic, around skin-breathing aquatic amphibians (FEDER AND BOOTH) **166**, 237
Brain:
Levels of serotonin in stressed Arctic charr (WINBERG, NILSSON AND OLSÉN) **165**, 229
Source of a factor that stimulates hydrocarbon deposition in diapausing flesh flies (YODER AND DENLINGER) **162**, 339
Brain neurones:
In the control of walking in a cricket (BÖHM AND SCHILDBERGER) **166**, 113
Branchiostegite:
Function in a mangrove crab (WILKENS AND YOUNG) **163**, 297
Breathing:
Intermittent, in torpid bats (SZEWCZAK AND JACKSON) **173**, 217
Scaling effects in mammals (YOUNG, WARREN AND ALTRINGHAM) **164**, 283
Synchronization with running in horses (YOUNG, ALEXANDER, WOAKES, BUTLER AND ANDERSON) **166**, 19
Brianstem:
Role in the stopping response of *Xenopus* embryos (BOOTHBY AND ROBERTS) **169**, 65
Brine shrimp:
Artemia franciscana, translational control of dormancy (HOFMANN AND HAND) **164**, 103
Effect of anoxia on the viability of encysted embryos (CLEGG) **169**, 255
Brush-border membrane vesicles:
Used to study glycine transport across insect midgut (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Buffering:
In lamprey red blood cells (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
***Bufo marinus*:**
Acid–base regulation in response to hypercapnia (GARLAND AND TOEWS) **170**, 271
Lymph heart pressure, rate and flow (JONES, WENTZELL AND TOEWS) **169**, 207
Buoyancy:
Regulation of, by the killifish (GOOLISH) **166**, 61
Burst speed:
Of sidewinding in *Crotalus cerastes* (SECOR, JAYNE AND BENNETT) **163**, 1
Bursting neurone:
In the protocerebrum of crayfish (MELLON, SANDEMAN AND SANDEMAN) **167**, 15
Bush cricket:
Sound reception (HARTLEY AND STEPHEN) **163**, 359
Butterfly:
Visual system, control of impulse discharge by the surround (ICHIKAWA) **171**, 247

Calcification:
Of the blue crab skeleton after moulting (NEUFELD AND CAMERON) **171**, 283
Calcium:
Ambient level, effect on stanniocalcin secretion in the eel (HANSSEN, MAYER-GOSTAN, FLIK AND WENDELAAR BONGA) **162**, 197
Intracellular concentration in leech glial cells (MUNSCH AND DEITMER) **167**, 251
Levels in corpus allatum cells in *Manduca sexta* (ALLEN, HERMAN AND GRANGER) **166**, 253
Measurement of, with flexible ion-sensitive electrodes (O'DONNELL) **162**, 353
Transport of, by isolated trout skin (MARSHALL, BRYSON AND WOOD) **166**, 297
Uptake of, by the blue crab (NEUFELD AND CAMERON) **171**, 283
Calcium action potential:
In an identified cockroach motoneurone (HANCOX AND PITMAN) **162**, 251
Calcium channel:
In yeast, modulation of (BERTL AND SLAYMAN) **172**, 271
Calcium currents:
In *Ascaris suum* muscle (MARTIN, THORN, GRATION AND HARROW) **173**, 75
In leg motoneurones from developing *Manduca sexta* (HAYASHI AND LEVINE) **171**, 15

***Calliactis parasitica*:**
Actions of Antho-RNamide on muscle (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295
***Callinectes sapidus*:**
Postmoult uptake of calcium (NEUFELD AND CAMERON) **171**, 283
***Callipepla gambelii*:**
Thermoregulation (ZERBA AND WALSBERG) **171**, 409
***Calliphora vomitoria*:**
Mechanical coupling of wing sensilla (DICKINSON) **169**, 221
Campaniform sensilla:
Of the fly wing, responses to wing deformation (DICKINSON) **169**, 221
***Camponotus vicinus*:**
Water loss during discontinuous ventilation (LIGHTON) **173**, 289
***Cancer pagurus*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Capacitance:
Compartmental, in V-ATPase-coupled ion movements (MARTIN) **172**, 387
CAP_2:
Role in regulation of hindgut activity in larval *Mandua sexta* (TUBLITZ, ALLEN, CHEUNG, EDWARDS, KIMBLE, LOI AND SYLWESTER) **165**, 241
Capillary action:
In the lungs of the soldier crab (MAITLAND AND MAITLAND) **163**, 333
***Carassius carassius*:**
Effect of season and temperature on heart function (MATIKAINEN AND VORNANEN) **167**, 203
Metabolic depression during anoxia (NILSSON) **164**, 243
***Carausius morosus*:**
Functional specialization in the femoral chordotonal organ (KITTMANN AND SCHMITZ) **173**, 91
Carbon dioxide:
Compartmental distribution in rainbow trout (TANG, LIN AND RANDALL) **169**, 235
Partial pressure of, in the air sacs of hypothermic pigeons (JENSEN AND BECH) **165**, 111
Transport in lamprey blood (TUFTS, BAGATTO AND CAMERON) **169**, 105; (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
***Carcinus maenas*:**
Actin gene expression during muscle growth (WHITELEY, TAYLOR AND EL HAJ) **167**, 277
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Cardiovascular responses to exercise (HAMILTON AND HOULIHAN) **162**, 37
Proprioceptive input to leg motoneurones (HEAD AND BUSH) **163**, 187
Cardiac myoglobin:
And metmyoglobin reductase (BAILEY AND DRIEDZIC) **173**, 301
Cardiac output:
In the tufted duck during swimming and diving (BEVAN AND BUTLER) **168**, 199
Of antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
Of diving emperor penguins (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LeMAHO) **165**, 161
Cardiac performance:
Of sexually mature rainbow trout (FRANKLIN AND DAVIE) **171**, 139
Of the perfused trout heart (FRANKLIN AND DAVIE) **166**, 47
Cardioacceleratory peptides:
Effects on larval and adult *Manduca sexta* (TUBLITZ, CHEUNG, EDWARDS, SYLWESTER AND REYNOLDS) **165**, 265
Cardioactive peptide:
Effects in larval and adult *Manduca sexta* (TUBLITZ, CHEUNG, EDWARDS, SYLWESTER AND REYNOLDS) **165**, 265
Role in regulation of hindgut activity in larval *Manduca sexta* (TUBLITZ, ALLEN, CHEUNG, EDWARDS, KIMBLE, LOI AND SYLWESTER) **165**, 241
Cardiogenic pulsations:
Role in oxygen uptake in torpid bats (SZEWCZAK AND JACKSON) **173**, 217
Cardiovascular physiology:
Of the dogfish (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Carp:
Effect of season and temperature on heart function (MATIKAINEN AND VORNANEN) **167**, 203
Potassium transport across the red blood cell membrane (JENSEN) **171**, 349
Carpet shark:
Noise cancellation in the electrosensory system (BODZNICK AND MONTGOMERY) **171**, 127

***Cataglyphis bicolor*:**
Water loss during discontinuous ventilation (LIGHTON) **173**, 289

Catch:
In sea urchin muscle (TSUCHIYA, OBINATA, SATO, MORI, SUZUKI AND AMEMIYA) **162**, 361

Catecholamines:
Effects on teleost erythrocytes (PERRY AND REID) **167**, 235
In trout plasma, effects of serotonin (FRITSCHE, THOMAS AND PERRY) **173**, 59

Cation channel:
Stretch-activated, in teleost intestine (CHANG AND LORETZ) **169**, 87

Cell culture:
Of developing leg motoneurones from *Manduca sexta*, ion currents (HAYASHI AND LEVINE) **171**, 15

Cell death:
Programmed, at neuromuscular junctions during metamorphosis (SONEA AND RHEUBEN) **167**, 61

Cell motility:
Aggregation of screening pigment in frog and crayfish (MONDRAGÓN AND FRIXIONE) **166**, 197

Central nervous system:
Intracellular calcium transients in leech glial cells (MUNSCH AND DEITMER) **167**, 251

Central pattern generator:
Development of, in the leech (JELLIES, KOPP AND BLEDSOE) **170**, 71
For the swimmeret rhythm in crayfish, control of (CATTAERT, BARTHE, NEIL AND CLARAC) **169**, 181
In the lobster stomatogastric system (REZER AND MOULINS) **163**, 209

Centre of area:
Of a hawk's wing (TUCKER) **165**, 21

Centre of pressure:
Of a hawk's wing (TUCKER) **165**, 21

Cephalopod:
Biochemistry of squid muscle (KIER AND SCHACHAT) **168**, 41
Function of the olfactory organ in squid (GILLY AND LUCERO) **162**, 209
Stimulation of olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231

***Cephaloscylium isabella*:**
Noise cancellation in the electrosensory system (BODZNICK AND MONTGOMERY) **171**, 127

Cerebellum:
Effect of lesions on swimming performance of trout (ROBERTS, VAN ROSSEM AND DE JAGER) **167**, 171

CF_1F_o:
Structure and regulation of (McCARTY) **172**, 431

Chaetognath:
Sagitta elegans, undulatory locomotion (JORDAN) **163**, 119

***Chamaeleo jacksonii*:**
Mechanism of tongue projection (WAINWRIGHT AND BENNETT) **168**, 1, 23

Chaotropic anions:
Effect on halobacterial V-ATPases (IHARA, ABE, SUGIMURA AND MUKOHATA) **172**, 475

***Chelonia mydas*:**
Orientation of hatchlings to waves (LOHMANN AND LOHMANN) **171**, 1

***Chelydra serpentina*:**
Kinematics of aquatic prey capture (LAUDER AND PRENDERGAST) **164**, 55

Chemiosmotic energy coupling:
In neuronal and endocrine systems (MORIYAMA, MAEDA AND FUTAI) **172**, 171

Chemoreception:
By squid olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231
Function of the olfactory organ in squid (GILLY AND LUCERO) **162**, 209
Ionic conductances in salmon olfactory receptor cells (NEVITT AND MOODY) **166**, 1

Chemoreceptor:
On the locust maxillary palp, modulation of responsiveness (SIMPSON AND ABISGOLD) **168**, 269

***Cherax destructor*:**
Oscillatory olfactory interneurones (MELLON, SANDEMAN AND SANDEMAN) **167**, 15

Chick:
Kinematics of walking, swimming and airstepping (JOHNSTON AND BEKOFF) **171**, 43

Chicken:
Exercise-induced remodelling of mature bone (LOITZ AND ZERNICKE) **170**, 1

Chloride cells:
Role in calcium transport by trout skin (MARSHALL, BRYSON AND WOOD) **166**, 297

Chloride channel:
Role in cystic fibrosis (AL-AWQATI, BARASCH AND LANDRY) **172**, 245

Chloroplast:
Partial reactions of the proton with F-ATPase (JUNGE, ENGELBRECHT, GRIWATZ AND GROTH) **172**, 461
Structure of ATP synthase (McCARTY) **172**, 431
Cholecystokinin-8:
Effect on branchial blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Chordotonal organ:
Of the metathoracic leg of the locust (SHELTON, STEPHEN, SCOTT AND TINDALL) **163**, 345
Chromaffin granules:
Role of V-ATPase in neuronal and endocrine systems (MORIYAMA, MAEDA AND FUTAI) **172**, 171
Structure and function of V-ATPases (NELSON) **172**, 149
Chromophore:
Circadian rhythms of 11-*cis* retinal in a crustacean compound eye (HARIYAMA AND TSUKAHARA) **167**, 39
***Chrysopa dasyptera*:**
Flow visualization (GRODNITSKY AND MOROZOV) **169**, 143
Cicada:
Sound production (BENNET-CLARK AND YOUNG) **173**, 123
Cinematography:
Of locust flight (ROBERTSON AND REYE) **163**, 231
Circadian rhythm:
Of 11-*cis* retinal in a crustacean compound eye (HARIYAMA AND TSUKAHARA) **167**, 39
Circuit analysis:
Of V-ATPase-coupled ion movements (MARTIN) **172**, 387
Circulation:
Branchial blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Changes in a crab in response to exercise (HAMILTON AND HOULIHAN) **162**, 37
Effect of serotonin in trout (FRITSCHE, THOMAS AND PERRY) **173**, 59
Claw:
Asymmetry, development of, in the lobster (GOVIND AND PEARCE) **171**, 149
Climbing performance:
Of migrating birds (HEDENSTRÖM AND ALERSTAM) **164**, 19
***Clione limacina*:**
Interneurones mediating the escape reaction (ARSHAVSKY, DELIAGINA, ORLOVSKY, PANCHIN AND POPOVA) **164**, 307
Cl^- transport:
Across locust hindgut (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 275
***Clupea harengus*:**
Effect of temperature on swimming performance (BATTY AND BLAXTER) **170**, 187
***Cnemidophorus tigris*:**
Lateral bending during locomotion (RITTER) **173**, 1
Coated vesicle:
Role in intracellular acidification (MELLMAN) **172**, 39
Structure and function of V-ATPases (NELSON) **172**, 149
Structure, function and regulation of V-ATPases (FORGAC) **172**, 155
Cobalt:
Effect on the detection of infrasound by the perch (KARLSEN) **171**, 163
Cockroach:
Effect of deltamethrin on cultured neurones (AMAR, PICHON AND INOUE) **163**, 65
Effect of dithiothreitol on acetylcholine receptors (LEECH, BAI AND SATTELLE) **169**, 267
Paternal nitrogen investment (MULLINS, KEIL AND WHITE) **162**, 55
Time-dependent action potentials in an identified motoneurone (HANCOX AND PITMAN) **162**, 251
Cod:
Branchial blood flow (SUNDIN AND NILSSON) **165**, 73
Control of stomach volume (GROVE AND HOLMGREN) **163**, 33
Response to hypoxia at various environmental salinities (CLAIREAUX AND DUTIL) **163**, 97
Scaling of muscle power output (ANDERSON AND JOHNSTON) **170**, 143
Collecting duct:
Polarity of V-ATPase in epithelial cells (BROWN, SABOLIC AND GLUCK) **172**, 231
Colour:
Discrimination of, by a mollusc (NISHI AND GOTOW) **168**, 77
***Columba livia*:**
Effect of anosmia on homing performance (SCHLUND) **164**, 171
Effect of hypothermia on ventilation and air-sac gases (JENSEN AND BECH) **165**, 111
Effect of loft location on homing (WALCOTT) **170**, 127
Magnetoreception (COUVILLON, ASAM AND BITTERMAN) **173**, 295

Role of the brain opioid system in navigation (PAPI, LUSCHI AND LIMONTA) **166**, 169
Thermosensitivity of the spinal cord (ØSTNES AND BECH) **162**, 185
Command neurone:
For course control in a walking cricket (BÖHM AND SCHILDBERGER) **166**, 113
Communication:
Electric organ discharges of breeding electric fish (CRAWFORD) **164**, 79
Concanavalin A:
Effect on growth of cultured leech Retzius cells (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1
***Conocephalus dorsalis*:**
Sound reception (HARTLEY AND STEPHEN) **163**, 359
Conopressin G:
Effect on *Aplysia californica* siphon sensory neurones (MARTÍNEZ-PADRÓN, EDSTROM, WICKHAM AND LUKOWIAK) **171**, 79
Contractile vacuole:
In hydroid stolons (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Contraction:
Cellular, in *Vorticella* (KATOH AND NAITOH) **168**, 253
Of carp heart, effect of season and temperature (MATIKAINEN AND VORNANEN) **167**, 203
Cooperativity:
Allosteric modulation of lobster haemocyanin (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93; (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Coordination:
Inter- and intrajoint, in chick hindlimbs (JOHNSTON AND BEKOFF) **171**, 43
***Coregonus lavaretus*:**
Energy partitioning (WIESER, LAICH AND MEDGYESY) **169**, 165
Corpus allatum:
Of larval *Manduca sexta*, intracellular calcium levels (ALLEN, HERMAN AND GRANGER) **166**, 253
Corpus cardiacum:
Of the locust, source of a neuropeptide that influences ileal transport (AUDSLEY, MCINTOSH AND PHILLIPS) **173**, 261
Cost of growth:
In two teleosts (WIESER, LAICH AND MEDGYESY) **169**, 165
Cost of transport:
Of a sidewinding snake (SECOR, JAYNE AND BENNETT) **163**, 1
Cotransport:
Of ions, circuit analysis of (MARTIN) **172**, 387
Coupling:
Of ATP catalysis with proton translocation in *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Course control:
In a walking cricket (BÖHM AND SCHILDBERGER) **166**, 113
Crab:
Actin gene expression during muscle growth (WHITELEY, TAYLOR AND EL HAJ) **167**, 277
Carcinus maenas, proprioceptive input to leg motoneurones (HEAD AND BUSH) **163**, 187
Cardiovascular responses to exercise in *Carcinus maenas* (HAMILTON AND HOULIHAN) **162**, 37
Goniopsis cruentata, regulation of pulmonary blood flow and of blood pressure (WILKENS AND YOUNG) **163**, 297
Mictyris longicarpus, functional design of the lungs (MAITLAND AND MAITLAND) **163**, 333
Pachygrapsus crassipes, walking kinematics (HUI) **165**, 213
Postmoult uptake of calcium (NEUFELD AND CAMERON) **171**, 283
Crayfish:
Control of the swimmeret rhythm (CATTAERT, BARTHE, NEIL AND CLARAC) **169**, 181
Inhibition of screening-pigment aggregation (MONDRAGÓN AND FRIXIONE) **166**, 197
Oscillatory olfactory interneurones in the protocerebrum (MELLON, SANDEMAN AND SANDEMAN) **167**, 15
Procambarus clarkii, behavioural responses to light (FERNÁNDEZ-DE-MIGUEL AND ARÉCHIGA) **164**, 153
Cricket:
Brain neurones involved in the control of walking (BÖHM AND SCHILDBERGER) **166**, 113
Escape behaviour (GRAS AND HÖRNER) **171**, 189
Interneurones in the maturing central nervous system (CHIBA, KÄMPER AND MURPHEY) **164**, 205
Neurophysiology of escape behaviour (HÖRNER) **171**, 215
Phonotactic response (MILES, MAY, HOLBROOK AND HOY) **169**, 19

Critical swimming speed:
Variations among individual largemouth bass (KOLOK) **170**, 265
***Crotalus cerastes*:**
Locomotor performance and the cost of sidewinding (SECOR, JAYNE AND BENNETT) **163**, 1
Crustacean:
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Cryobiology:
Freeze tolerance of hatchling turtles (CHURCHILL AND STOREY) **167**, 221
Cryoprotectants:
Synthesis of, by hatchling turtles (CHURCHILL AND STOREY) **167**, 221
C-starts:
Effect of temperature on fish larvae (BATTY AND BLAXTER) **170**, 187
Cultured neurones:
From embryonic cockroaches, effects of deltamethrin (AMAR, PICHON AND INOUE) **163**, 65
***Cupiennius salei*:**
Quality of vision (LAND AND BARTH) **164**, 227
Cyclic AMP:
Effect on ion and fluid transport in insect Malpighian tubules (MADDRELL AND O'DONNELL) **172**, 417
Effect on trout and eel erythrocytes (PERRY AND REID) **167**, 235
Production in Malpighian tubules of the house cricket (COAST, HAYES, KAY AND CHUNG) **162**, 331
***Cyclochila australasiae*:**
Sound production (BENNET-CLARK AND YOUNG) **173**, 123
***Cyprinus carpio*:**
Potassium transport across the red blood cell membrane (JENSEN) **171**, 349
Cystic fibrosis:
Role of vacuolar chloride channels (AL-AWQATI, BARASCH AND LANDRY) **172**, 245

Damping:
Forces in marlin intervertebral joints (LONG) **162**, 131
DCCD:
Reaction with larval *Manduca sexta* midgut vacuolar-type ATPase (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **165**, 273
Degeneration:
Of muscle fibres during metamorphosis (RHEUBEN) **167**, 91
Of the function of neuromuscular junctions during metamorphosis (SONEA AND RHEUBEN) **167**, 61
Deltamethrin:
Effect on cultured neurones from embryonic cockroaches (AMAR, PICHON AND INOUE) **163**, 65
Denervation:
Of tongue muscle, effects on prey capture by a tree frog (DEBAN AND NISHIKAWA) **170**, 235
Deutocerebrum:
Oscillatory olfactory neurones in crayfish (MELLON, SANDEMAN AND SANDEMAN) **167**, 15
Development:
Degenerative changes in insect muscle fibres during metamorphosis (RHEUBEN) **167**, 91
Ion currents in motoneurones from postembryonic *Manduca sexta* (HAYASHI AND LEVINE) **171**, 15
Of claw laterality in the lobster (GOVIND AND PEARCE) **171**, 149
Of *Manduca sexta*, calcium concentrations in corpus allatum cells (ALLEN, HERMAN AND GRANGER) **166**, 253
Diapause:
In the flesh fly, deposition of hydrocarbons (YODER AND DENLINGER) **162**, 339
Diaphorase:
In fish heart (BAILEY AND DRIEDZIC) **173**, 301
Dicyclohexylcarbodiimide:
Reaction with vacuolar-type ATPase from the midgut of larval *Manduca sexta* (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **165**, 273
Diet:
Selection of, by larvae of *Spodoptera littoralis* (SIMMONDS, SIMPSON AND BLANEY) **162**, 73
***Diomedea exulans*:**
Stomach temperature during feeding (WILSON, COOPER AND PLÖTZ) **167**, 267
Dipeptide:
Effect of NMDA on squid Schwann cell (EVANS, REALE, MERZON AND VILLEGAS) **173**, 229
***Dipsosaurus dorsalis*:**
Lateral bending during locomotion (RITTER) **173**, 1

Directional sensitivity:
Of fly wing campaniform sensilla (DICKINSON) **169**, 221
Dithiothreitol:
Effect on receptors on an identified insect neurone (LEECH, BAI AND SATTELLE) **169**, 267
Diuretic hormone:
Effect on house cricket Malpighian tubules (COAST, HAYES, KAY AND CHUNG) **162**, 331
Dive depth:
Of emperor penguins (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LEMAHO) **165**, 161
Diving:
Cardiovascular changes in the tufted duck (BEVAN AND BUTLER) **168**, 199
Depth and duration of, by emperor penguins (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LEMAHO) **165**, 161
In ducks, blood flow distribution (STEPHENSON AND JONES) **166**, 285
In ducks, effects of temperature (BEVAN AND BUTLER) **163**, 139
Oxygen consumption by aquatic birds (BEVAN, KEIJER AND BUTLER) **162**, 91
Performance of Weddell seals (CASTELLINI, KOOYMAN AND PONGANIS) **165**, 181
Dogfish:
Gut blood flow (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
L-Dopamine:
Effect on the electrical responses of squid olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231
Dormancy:
Translational control of, in *Artemia franciscana* (HOFMANN AND HAND) **164**, 103
Double-focal microscopy:
Used to examine rotational movement of a spermatozoon (ISHIJIMA, HAMAGUCHI, NARUSE, ISHIJIMA AND HAMAGUCHI) **163**, 15
Drag:
In undulatory swimming (WEBB) **162**, 157
Of a hawk's wing (PENNYCUICK, HEINE, KIRKPATRICK AND FULLER) **165**, 1
***Drosophila melanogaster*:**
Repolarization of presynaptic motor terminals (GHO AND GANETZKY) **170**, 93
Duck:
Aythya americana, blood flow distribution during diving (STEPHENSON AND JONES) **166**, 285
DUM neurones:
Innervating the locust oviduct (KALOGIANNI AND PFLÜGER) **168**, 177

Echocardiography:
Used to measure ventricle dimensions of the perfused trout heart (FRANKLIN AND DAVIE) **166**, 47
Echolocation:
By bats, monitored by radiotelemetry (LANCASTER, KEATING AND HENSON) **173**, 43
Eel:
Gas deposition into the swimbladder (PELSTER AND SCHEID) **173**, 205
Stanniocalcin secretion (HANSSEN, MAYER-GOSTAN, FLIK AND WENDELAAR BONGA) **162**, 197
Effector binding sites:
On lobster haemocyanin (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Elasmobranch:
Electrosensory common mode signal suppression (BODZNICK, MONTGOMERY AND BRADLEY) **171**, 107
Gut blood flow in the dogfish (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Noise cancellation in the carpet shark electrosensory system (BODZNICK AND MONTGOMERY) **171**, 127
Electric fish:
Specificity in the discharges of breeding mormyrids (CRAWFORD) **164**, 79
Electroenzymes:
Integrative functions of V-ATPases (SLAYMAN) **172**, 267
Electromyography:
Of aquatic and terrestrial locomotion in salamanders (FROLICH AND BIEWENER) **162**, 107
Of locust flight muscle (FOSTER AND ROBERTSON) **162**, 295
Of the pyloric rhythm in a lobster (REZER AND MOULINS) **163**, 209
Of tongue projection in chameleons (WAINWRIGHT AND BENNETT) **168**, 1
Used to study propulsive leg extension in arachnids (SHULTZ) **162**, 313
Electron paramagnetic resonance:
Used to measure oxyradical production in a symbiosis (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
Electroreception:
Common mode signal suppression in the skate (BODZNICK, MONTGOMERY AND BRADLEY) **171**, 107

Suppression of ventilatory reafference in the carpet shark (BODZNICK AND MONTGOMERY) **171**, 127
Electrosensory system:
Specificity in the discharges of breeding mormyrids (CRAWFORD) **164**, 79
***Eleuthera dichotoma*:**
Stolonal contractions (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
***Elysia chlorotica*:**
Effect of hypo-osmotic stress on neuronal membrane depolarization (QUINN AND PIERCE) **163**, 169
Embryo:
Encysted, of the brine shrimp, effect of anoxia on viability (CLEGG) **169**, 255
Of the blenny, amino acid uptake (KORSGAARD) **171**, 315
Embryogenesis:
Of leech motoneurones (JELLIES, KOPP AND BLEDSOE) **170**, 71
Emperor penguin:
Diving performance (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LEMAHO) **165**, 161
Endocyte:
Role of acidification in intracellular membrane traffic (MELLMAN) **172**, 39
Endoderm:
Of hydroid stolon, contain contractile vacuoles (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Endosome:
Acidification of, in phagocytic cells (GRINSTEIN, NANDA, LUKACS AND ROTSTEIN) **172**, 179
Role of acidification in intracellular membrane traffic (MELLMAN) **172**, 39
Endotherms:
Marine, feeding (WILSON, COOPER AND PLÖTZ) **167**, 267
Endurance:
Of a sidewinding snake (SECOR, JAYNE AND BENNETT) **163**, 1
Energetics:
Of muscle, scaling (ROME) **168**, 243
Energy charge:
Of trout white muscle during recovery from exercise (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Energy partitioning:
In two teleosts (WIESER, LAICH AND MEDGYESY) **169**, 165
Energy utilization:
In the brain of the anoxic turtle (NILSSON AND LUTZ) **162**, 345
***Entamoeba*:**
Ion transport in (BAKKER-GRUNWALD) **172**, 311
***Entamoeba histolytica*:**
V-ATPase (GLUCK) **172**, 29
Enterocyte:
From tilapia, Na^+/Ca^{2+} exchangers (SCHOENMAKERS AND FLIK) **168**, 151
Epithelium:
Of the body surface, role in ion transport in hypercapnic trout (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43
Of the mussel gill, transport of taurine across (SILVA AND WRIGHT) **162**, 265
***Eptesicus fuscus*:**
Apnoeic oxygen uptake (SZEWCZAK AND JACKSON) **173**, 217
***Equus caballus*:**
Synchronization of ventilation and locomotion (YOUNG, ALEXANDER, WOAKES, BUTLER AND ANDERSON) **166**, 19
***Eriocheir sinensis*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Erythrocyte:
From beagles, Na^+/Ca^{2+} exchangers (SCHOENMAKERS AND FLIK) **168**, 151
In lamprey, role in transport of blood gases (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
Of teleosts, adrenergic responses (PERRY AND REID) **167**, 235
Role in blood gas transport in the lamprey (TUFTS, BAGATTO AND CAMERON) **169**, 105
Escape:
Behaviour of tethered crickets (GRAS AND HÖRNER) **171**, 189
Neurophysiology of, in the cricket (HÖRNER) **171**, 215
Response of squid to noxious stimuli (GILLY AND LUCERO) **162**, 209
Escape behaviour:
Effect of temperature on fish larvae (BATTY AND BLAXTER) **170**, 187
Escape reaction:
Neural mechanism of, in a pteropod mollusc (ARSHAVSKY, DELIAGINA, ORLOVSKY, PANCHIN AND POPOVA) **164**, 307
***Escherichia coli*:**
Structure and regulation of F-ATPase (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Structure of the F_o complex of F-ATPase (DECKERS-HEBESTREIT AND ALTENDORF) **172**, 451

***Esox lucius*:**
Energy partitioning (WIESER, LAICH AND MEDGYESY) **169**, 165
Ethanol:
Production of, during anoxia in crucian carp (NILSSON) **164**, 243
***Eumeces multivirgatus*:**
Lateral bending during locomotion (RITTER) **173**, 1
Evolution:
Of plant V-ATPases (TAIZ) **172**, 113
Of propulsive leg extension in arachnids (SHULTZ) **162**, 313
Of V-ATPases (GOGARTEN, STARKE, KIBAK, FISHMANN AND TAIZ) **172**, 137; (NELSON) **172**, 19
Excess post-exercise oxygen consumption:
In juvenile rainbow trout (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Excitability:
Time-dependent, in an identified cockroach motoneurone (HANCOX AND PITMAN) **162**, 251
Excitation:
Of sea anemone longitudinal muscle by Antho-RNamide (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295
Excitation–contraction coupling:
In trout myocardium (HOVE-MADSEN) **167**, 47
Excretion:
Of salt, by insects (ZEISKE) **172**, 323
Exercise:
Cardiovascular responses to, in a crab (HAMILTON AND HOULIHAN) **162**, 37
Effect of splenectomy on rainbow trout (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
Effect on blood gas transport in the lamprey (TUFTS, BAGATTO AND CAMERON) **169**, 105
Effect on cardiovascular variables of antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
Effect on metabolism of rainbow trout (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Effect on the compartmental distribution of carbon dioxide and ammonia in trout (TANG, LIN AND RANDALL) **169**, 235
Heat generated, role in thermoregulation in a quail (ZERBA AND WALSBERG) **171**, 409
Recovery from, of trout white muscle (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Strenuous, induces remodelling of mature bone (LOITZ AND ZERNICKE) **170**, 1
Exoskeleton:
Mechanical scaling of locust tibia (KATZ AND GOSLINE) **168**, 125
Eye:
Of a winkle, resolution and sensitivity (SEYER) **170**, 57
Structure and function in a ctenid spider (LAND AND BARTH) **164**, 227
Eye movements:
Visual tracking in a stomatopod (CRONIN, YAN AND BIDLE) **171**, 373

F_o complex:
Of F-ATPase, structure of (DECKERS-HEBESTREIT AND ALTENDORF) **172**, 451
F_1F_o:
In plant cells (McCARTY) **172**, 431
Facilitation:
Long-term, decline of, at neuromuscular junctions during metamorphosis (SONEA AND RHEUBEN) **167**, 61
Of melanophore responses in the winter flounder (BURTON AND O'DRISCOLL) **168**, 289
Fasting:
Effect on alanine metabolism by trout hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
F-ATPase:
In chloroplasts, partial reactions of the proton (JUNGE, ENGELBRECHT, GRIWATZ AND GROTH) **172**, 461
Molecular biology and evolution (NELSON) **172**, 19
Of *Escherichia coli*, structure of the F_o complex (DECKERS-HEBESTREIT AND ALTENDORF) **172**, 451
Structure and regulation of, in *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Fatty acid:
8,11,14-eicosatrienoic acid, role in the induction of spawning in the male lugworm (PACEY AND BENTLEY) **173**, 165
Feedback loop:
The femur–tibia control loop in stick insects (KITTMANN AND SCHMITZ) **173**, 91
Feeding:
In *Aplysia oculifera*, adaptation to changes in food size (HURWITZ AND SUSSWEIN) **166**, 215
In tarantulas (DUNLOP, ALTRINGHAM AND MILL) **166**, 83

Control of rhythmic buccal motor activity in a snail (YOSHIDA AND KOBAYASHI) **164**, 117
Kinematics of aquatic prey capture in a turtle (LAUDER AND PRENDERGAST) **164**, 55
Kinematics of, in a lizard (DELHEUSY AND BELS) **170**, 155
Kinematics of prey capture in a tree frog (DEBAN AND NISHIKAWA) **170**, 235
Mechanism of tongue projection in chameleons (WAINWRIGHT AND BENNETT) **168**, 1, 23
Modulation of gustatory responsiveness in the locust (SIMPSON AND ABISGOLD) **168**, 269
Stomach temperature in the wandering albatross (WILSON, COOPER AND PLÖTZ) **167**, 267

Fields of view:
Of the eyes of a ctenid spider (LAND AND BARTH) **164**, 227

Filiform hair sensilla:
Responses of, in the maturing cricket (CHIBA, KÄMPER AND MURPHEY) **164**, 205

Fin whale:
Magnetic sensitivity (WALKER, KIRSCHVINK, AHMED AND DIZON) **171**, 67

Flagellum:
Rotation of a sperm around its long axis (ISHIJIMA, HAMAGUCHI, NARUSE, ISHIJIMA AND HAMAGUCHI) **163**, 15

Flesh fly:
Deposition of puparial hydrocarbons (YODER AND DENLINGER) **162**, 339

Flexural stiffness:
Of the locust tibia (KATZ AND GOSLINE) **168**, 125

Flight:
Climbing performance of migrating birds (HEDENSTRÖM AND ALERSTAM) **164**, 19
Control of, in the locust, role of the visual flow field (BAADER, SCHÄFER AND ROWELL) **165**, 137
Effect of temperature on wing-beat frequency in locusts (FOSTER AND ROBERTSON) **162**, 295
Flow visualization around green lacewings (GRODNITSKY AND MOROZOV) **169**, 143
Locust wing movements during avoidance behaviour (ROBERTSON AND REYE) **163**, 231
Optimization of airspeed by terns (WAKELING AND HODGSON) **169**, 261
Pectoralis force and power output in the starling (BIEWENER, DIAL AND GOSLOW) **164**, 1
Phonotactic response of crickets (MILES, MAY, HOLBROOK AND HOY) **169**, 19
Pitching equilibrium, wing span and tail span of a gliding hawk (TUCKER) **165**, 21

Flight steering:
Of locusts flying under closed-loop visual conditions (HENSLER) **168**, 301

Flounder:
Facilitation of melanophore responses (BURTON AND O'DRISCOLL) **168**, 289

Flow:
Through the toad lymph heart (JONES, WENTZELL AND TOEWS) **169**, 207

Flow field:
Visual, perception of, by the locust (BAADER, SCHÄFER AND ROWELL) **165**, 137

Flow visualization:
Around tethered flying green lacewings (GRODNITSKY AND MOROZOV) **169**, 143

Fluid secretion:
By Malpighian tubules of the house cricket (COAST, HAYES, KAY AND CHUNG) **162**, 331

Fluid transport:
In insect Malpighian tubules (MADDRELL AND O'DONNELL) **172**, 417

Fly:
Mechanical coupling of wing sensilla (DICKINSON) **169**, 221

Footfall pattern:
In walking and running mole rats (EILAM AND SHEFER) **173**, 155

Force:
Output of the pectoralis during flight in the starling (BIEWENER, DIAL AND GOSLOW) **164**, 1
Transmission of, in marlin intervertebral joints (LONG) **162**, 131

Force–frequency relationship:
Of trout myocardium, effects of temperature and ryanodine (HOVE-MADSEN) **167**, 47

Formaldehyde:
Effect on the transmembrane sodium gradient in a mussel (BØRSETH, AUNAAS, EINARSON, NORDTUG, OLSEN AND ZACHARIASSEN) **169**, 1

Freeze tolerance:
Of hatchling turtles (CHURCHILL AND STOREY) **167**, 221

Freezing:
Resistance to, of fish skin (VALERIO, KAO AND FLETCHER) **164**, 135

Freshwater fish:
Oxygen consumption and ion loss (GONZALEZ AND McDONALD) **163**, 317

Freshwater-adapted trout:
Calcium transport by isolated skin (MARSHALL, BRYSON AND WOOD) **166**, 297
Frog:
Effect of the hypoxic boundary layer on cutaneous gas exchange (FEDER AND BOOTH) **166**, 237
Inhibition of screening-pigment aggregation (MONDRAGÓN AND FRIXIONE) **166**, 197
Ionic basis of the sugar-induced receptor potential (OKADA, MIYAMOTO AND SATO) **162**, 23
Proton pump in mitochondria-rich skin cells (HARVEY) **172**, 289
FSBA:
Binding to midgut V-ATPase of *Manduca sexta* (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **164**, 301
Fuel load:
Of migrating birds (HEDENSTRÖM AND ALERSTAM) **164**, 19
Function:
Of mammalian V-ATPases (NELSON) **172**, 149
Of V-ATPases from coated vesicles (FORGAC) **172**, 155
***Fundulus heteroclitus*:**
Swimbladder function and buoyancy regulation (GOOLISH) **166**, 61
Fungal vacuole:
Acidification by V-ATPase (STEVENS) **172**, 47
V-ATPase of *Neurospora crassa* (BOWMAN, DSCHIDA AND BOWMAN) **172**, 57
Fura-2:
Used to measure free calcium concentration in corpus allatum cells (ALLEN, HERMAN AND GRANGER) **166**, 253
Used to measure intracellular calcium concentration in leech glial cells (MUNSCH AND DEITMER) **167**, 251
Furosemide:
Effect on ion and fluid transport in insect Malpighian tubules (MADDRELL AND O'DONNELL) **172**, 417

GABA:
Role in metabolic depression in anoxic crucian carp (NILSSON) **164**, 243
***Gadus morhua*:**
Branchial blood flow (SUNDIN AND NILSSON) **165**, 73
Control of stomach volume (GROVE AND HOLMGREN) **163**, 33
Response to hypoxia at various environmental salinities (CLAIREAUX AND DUTIL) **163**, 97
Scaling of fast muscle power output (ANDERSON AND JOHNSTON) **170**, 143
Gas exchange:
After exercise in juvenile rainbow trout (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Cutaneous, in amphibians (FEDER AND BOOTH) **166**, 237
In a freshwater fish (GONZALEZ AND McDONALD) **163**, 317
In the eel gas gland (PELSTER AND SCHEID) **173**, 205
Gas transfer:
In trout gills, effects of serotonin (FRITSCHE, THOMAS AND PERRY) **173**, 59
Gas transport:
By crustacean blood (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Gastric distension:
In the Atlantic cod (GROVE AND HOLMGREN) **163**, 33
In the rainbow trout (GROVE AND HOLMGREN) **163**, 49
Gastropod:
Littorina littorea, resolution and sensitivity of the eye (SEYER) **170**, 57
Gastrovascular flow:
In hydroid stolons (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Gene:
For fungal V-ATPase (BOWMAN, DSCHIDA AND BOWMAN) **172**, 57
Gene expression:
During muscle growth in a crab (WHITELEY, TAYLOR AND EL HAJ) **167**, 277
Geomagnetic field:
Sensitivity to, of fin whales (WALKER, KIRSCHVINK, AHMED AND DIZON) **171**, 67
Geomagnetism:
Discrimination of, by pigeons (COUVILLON, ASAM AND BITTERMAN) **173**, 295
***Gerrhonotus kingii*:**
Lateral bending during locomotion (RITTER) **173**, 1
Gill:
Arterio-venous blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Function in a freshwater fish (GONZALEZ AND McDONALD) **163**, 317
Of the mussel, transport of taurine across (SILVA AND WRIGHT) **162**, 265
Permeability to ammonia, in trout (WILSON AND TAYLOR) **166**, 95

Vasculature, effect of serotonin in trout (FRITSCHE, THOMAS AND PERRY) **173**, 59
***Gillichthys mirabilis*:**
Characterization of a stretch-activated cation channel (CHANG AND LORETZ) **169**, 87
Glass catfish:
Sarcomere length changes during swimming (LIEBER, RAAB, KASHIN AND EDGERTON) **169**, 251
Glia:
Effect of a glutamate uptake inhibitor on the squid Schwann cell (EVANS, REALE, MERZON AND VILLEGAS) **173**, 251
NMDA and non-NMDA receptors in squid Schwann cells (EVANS, REALE, MERZON AND VILLEGAS) **173**, 229
Withdrawal from degenerating neuromuscular junctions during metamorphosis (RHEUBEN) **167**, 119
Glomerular filtration:
In rainbow trout (CURTIS AND WOOD) **173**, 181
***Glossina morsitans*:**
Neural regulation of pupariation (ŽĎÁREK AND DENLINGER) **173**, 11
Glutamate:
Effect on membrane conductance of lobster motoneurones (HASHEMZADEH-GARGARI AND FRESCHI) **169**, 53
Levels in the brain of anoxic carp (NILSSON) **164**, 243
Glycine:
Cation-driven transport of, across insect midgut (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Glycine-rich sequence:
In the F-ATPase from *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Glycogen:
Levels in exercised rainbow trout (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Goblet cell:
From *Manduca sexta* midgut, V-ATPase (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
In insect midgut, ion transport by (MOFFETT AND KOCH) **172**, 403
In insect midgut, pH gradients (DOW) **172**, 355
Goby:
Characterization of a stretch-activated cation channel (CHANG AND LORETZ) **169**, 87
***Goniopsis cruentata*:**
Regulation of pulmonary blood flow and of blood pressure (WILKENS AND YOUNG) **163**, 297
***Gonodactylus oerstedii*:**
Ocular tracking (CRONIN, YAN AND BIDLE) **171**, 373
***Grammastola cala*:**
Coupling between the heart and sucking stomach during ingestion (DUNLOP, ALTRINGHAM AND MILL) **166**, 83
Gravikinesis:
In *Paramecium* (OOYA, MOGAMI, IZUMI-KUROTANI AND BABA) **163**, 153
Gravitaxis:
In *Paramecium* (OOYA, MOGAMI, IZUMI-KUROTANI AND BABA) **163**, 153
Gravity:
Effect on swimming *Paramecium* (OOYA, MOGAMI, IZUMI-KUROTANI AND BABA) **163**, 153
Growth:
Of Arctic charr, effects of stress and starvation (WINBERG, NILSSON AND OLSÉN) **165**, 229
Growth rate:
Of two teleosts (WIESER, LAICH AND MEDGYESY) **169**, 165
***Gryllus bimaculatus*:**
Brain neurones involved in the control of walking (BÖHM AND SCHILDBERGER) **166**, 113
Escape behaviour (GRAS AND HÖRNER) **171**, 189
Neurophysiology of escape behaviour (HÖRNER) **171**, 215

H^+-ATPase:
Physiology of (HARVEY) **172**, 1
H^+ secretion:
Across locust hindgut (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 275
By mitochondria-rich cells of frog skin (HARVEY) **172**, 289
H^+ transport:
By the F-ATPase from *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Haematocrit:
In splenectomized rainbow trout (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
Haematophagy:
Characterization of a vasodilator in mosquito saliva (RIBIERO) **165**, 73

Haemocyanin:
Of lobster, allosteric modulation (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93; (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Haemoglobin:
Conformation of, effect on potassium transport across the carp red blood cell membrane (JENSEN) **171**, 349
Haldane effect:
In lamprey red blood cells (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
Halobacteria:
A-ATPase, comparison with V-ATPases (IHARA, ABE, SUGIMURA AND MUKOHATA) **172**, 475
Hearing:
Detection of infrasound by the perch (KARLSEN) **171**, 163
Detection of infrasound by the plaice (KARLSEN) **171**, 173
Heart:
Coupling to the sucking stomach in feeding tarantulas (DUNLOP, ALTRINGHAM AND MILL) **166**, 83
Effect of season and temperature on function in carp (MATIKAINEN AND VORNANEN) **167**, 203
Mass and power output in mature rainbow trout (FRANKLIN AND DAVIE) **171**, 139
Role of myoglobin (BAILEY AND DRIEDZIC) **173**, 301
Heart interneurones:
In the leech, acetylcholine is an inhibitory transmitter (SCHMIDT AND CALABRESE) **171**, 329
Heart rate:
During diving in aquatic birds (BEVAN, KEIJER AND BUTLER) **162**, 91
Of antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
Of diving tufted ducks (BEVAN AND BUTLER) **163**, 139
Of swimming sea lions (BUTLER, WOAKES, BOYD AND KANATOUS) **170**, 35
***Helix pomatia*:**
Serotonergic monosynaptic connections (VEHOVSKY, KEMENES AND S.-ROZSA) **173**, 109
Helmholtz resonator:
Formed by the abdomen of male cicadas (BENNET-CLARK AND YOUNG) **173**, 123
Herring:
Effect of temperature on swimming performance (BATTY AND BLAXTER) **170**, 187
Hibernation:
Apnoeic oxygen uptake by torpid bats (SZEWCZAK AND JACKSON) **173**, 217
Of reptiles, freeze tolerance of hatchling turtles (CHURCHILL AND STOREY) **167**, 221
High-performance liquid chromatography:
Used to isolate a locust neuropeptide (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 261
Hindgut:
Regulation of activity by an insect neuropeptide (TUBLITZ, ALLEN, CHEUNG, EDWARDS, KIMBLE, LOI AND SYLWESTER) **165**, 241
***Hirudo medicinalis*:**
Acetylcholine is an inhibitory transmitter in heart neurones (SCHMIDT AND CALABRESE) **171**, 329
Embryogenesis of motoneurones (JELLIES, KOPP AND BLEDSOE) **170**, 71
Growth and retraction of neurites by cultured Retzius cells (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1
Intracellular calcium concentrations in glial cells (MUNSCH AND DEITMER) **167**, 251
***Homarus americanus*:**
Abdominal postural motor responses (SUKHDEO AND PAGE) **162**, 167
Development of claw laterality (GOVIND AND PEARCE) **171**, 149
Effect of glutamate agonists on cardiac ganglion motoneurones (HASHEMZADEH-GARGARI AND FRESCHI) **169**, 53
***Homarus vulgaris*:**
Allosteric modulation of haemocyanin (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93; (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Homeostasis:
In insects (ZEISKE) **172**, 323
Homing:
Effect of anosmia on pigeons (SCHLUND) **164**, 171
Of pigeons, effects of loft location (WALCOTT) **170**, 127
Homologous neurones:
Embryogenesis of, in leech (JELLIES, KOPP AND BLEDSOE) **170**, 71
Hoof:
Of the horse, strain on the wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145

Hormonal control:
Of the permeability of the pronotum of *Periplaneta americana* (MACHIN, KESTLER AND LAMPERT) **171**, 395
Horse:
Strain on the hoof wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145
Synchronization of ventilation and locomotion (YOUNG, ALEXANDER, WOAKES, BUTLER AND ANDERSON) **166**, 19
House cricket:
Effect of diuretic hormone on fluid secretion by Malpighian tubules (COAST, HAYES, KAY AND CHUNG) **162**, 331
***Hyalophora cecropia*:**
Cation-driven glycine transport by larval midgut (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
***Hydractinia symbiolongicarpus*:**
Stolonal contractions (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Hydrocarbons:
Deposition of, in the diapausing flesh fly (YODER AND DENLINGER) **162**, 339
Hydroid:
Stolonal contractions mediated by vacuoles (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Hydrolysis:
Of ATP, in plant cells (McCARTY) **172**, 431
Hydrostatic forces:
Effect on buoyancy regulation in the killifish (GOOLISH) **166**, 61
20-Hydroxyecdysone:
Effect on muscle growth in a crab (WHITELEY, TAYLOR AND EL HAJ) **167**, 277
Hydroxyl radical:
Production of, in a sea anemone and its symbiotic algae (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
5-Hydroxytryptamine:
Cardiovascular effects in trout (FRITSCHE, THOMAS AND PERRY) **173**, 59
Effect on branchial blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Effect on calcium concentration in leech glial cells (MUNSCH AND DEITMER) **167**, 251
In identified neurones in *Helix* (VEHOVSKY, KEMENES AND S.-ROZSA) **173**, 109
***Hyla cinerea*:**
Kinematics of prey capture and tongue protraction (DEBAN AND NISHIKAWA) **170**, 235
Hypercapnia:
Effect on acid–base regulation in a toad (GARLAND AND TOEWS) **170**, 271
In trout, role of the secondary circulation in acid–base regulation (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43
Hypergravity:
Effect on swimming *Paramecium* (OOYA, MOGAMI, IZUMI-KUROTANI AND BABA) **163**, 153
Hypometabolism:
In anoxic crucian carp (NILSSON) **164**, 243
Hypo-osmotic stress:
Effect on mollusc neurones (QUINN AND PIERCE) **163**, 169
Hypothermia:
Effect on ventilation and air-sac gases in pigeons (JENSEN AND BECH) **165**, 111
Hypoxia:
Causes metabolic depression in crucian carp (NILSSON) **164**, 243
Effect on adenosine release by the brain of anoxic turtles (NILSSON AND LUTZ) **162**, 345
Effect on cardiovascular variables in antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
Effect on cod at various environmental salinities (CLAIREAUX AND DUTIL) **163**, 97
Effect on gas deposition in the eel gas gland (PELSTER AND SCHEID) **173**, 205
Effect on trout and eel erythrocytes (PERRY AND REID) **167**, 235
Effect on ventilation in a mangrove crab (WILKENS AND YOUNG) **163**, 297
Responses to, effects of diet in sturgeon (RANDALL, McKENZIE, ABRAMI, BONDIOLOTTI, NATIELLO, BRONZI, BOLIS AND AGRADI) **170**, 113

Identified glial cells:
In leech, intracellular calcium concentrations (MUNSCH AND DEITMER) **167**, 251
Identified neurone:
FFDN1, role in perception of the visual flow field in the locust (BAADER, SCHÄFER AND ROWELL) **165**, 137
In a cockroach, time-dependent action potential in (HANCOX AND PITMAN) **162**, 251
In the cockroach, effect of dithiothreitol on acetylcholine receptors (LEECH, BAI AND SATTELLE) **169**, 267
Involved in the control of rhythmic buccal motor activity in a snail (YOSHIDA AND KOBAYASHI) **164**, 117

Iguanidae:
Opluris cuvieri, kinematics of feeding behaviour (DELHEUSY AND BELS) **170**, 155
Ileum:
Of locust, actions of a neuropeptide that influences Cl^- transport (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 261, 275
Image:
Quality of, in the eyes of a ctenid spider (LAND AND BARTH) **164**, 227
Immunocytochemistry:
Used to demonstrate polarity of V-ATPase in kidney (BROWN, SABOLIC AND GLUCK) **172**, 231
Used to study V-ATPase in insect ion-transporting epithelia (KLEIN) **172**, 345
IMP:
Levels in trout white muscle during recovery from exercise (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Infrasound:
Detection of, by the perch (KARLSEN) **171**, 163
Detection of, by the plaice (KARLSEN) **171**, 173
Ingestion:
By a tarantula, coupling between the heart and sucking stomach (DUNLOP, ALTRINGHAM AND MILL) **166**, 83
Inhibition:
Of sea anemone circular muscle by Antho-RNamide (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295
Insect:
Mechanics and protein content of flight muscle (PECKHAM, CRIPPS, WHITE AND BULLARD) **168**, 57
Transepithelial ion transport (KLEIN) **172**, 345
Insecticidal protein:
Produced by *Bacillus thuringiensis* (WOLFERSBERGER) **172**, 377
Integument:
Of the mussel gill, transport of taurine across (SILVA AND WRIGHT) **162**, 265
Intercalated cell:
Of kidney, V-ATPase (GLUCK) **172**, 29
Interneurone:
In the butterfly visual system, control of discharge (ICHIKAWA) **171**, 247
In the leech heart, acetylcholine is an inhibitory transmitter (SCHMIDT AND CALABRESE) **171**, 329
Mediating the escape reaction of a pteropod mollusc (ARSHAVSKY, DELIAGINA, ORLOVSKY, PANCHIN AND POPOVA) **164**, 307
Role in escape behaviour in the cricket (HÖRNER) **171**, 215
Intervertebral joints:
In the blue marlin, forces in (LONG) **162**, 131
Intracellular recording:
From intact flying locusts (HENSLER) **168**, 301
Intraspecific variation:
Of swimming performance in fish (KOLOK) **170**, 265
Ion channels:
In squid olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231
Modulation of, in yeast (BERTL AND SLAYMAN) **172**, 271
Ion composition:
Of pleon fluid in *Porcellio scaber* (WRIGHT AND O'DONNELL) **164**, 189
Ion currents:
Serotonin-evoked, in locust neurones (BERMUDEZ, BEADLE AND BENSON) **165**, 43
Voltage-activated, in *Ascaris suum* muscle (MARTIN, THORN, GRATION AND HARROW) **173**, 75
Ion pump:
Electrogenic, in insect epithelia (WOLFERSBERGER) **172**, 377
Ion transport:
Across locust hindgut, effects of a neuropeptide (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 275
By insect epithelia (KLEIN) **172**, 345; (ZEISKE) **172**, 323
Epithelial, in hypercapnic trout (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43
In insect Malpighian tubules (MADDRELL AND O'DONNELL) **172**, 417
In parasitic protozoa (BAKKER-GRUNWALD) **172**, 311
Oxygen-dependent, across the carp red blood cell membrane (JENSEN) **171**, 349
Ionic circuits:
V-ATPase-coupled ion movements (MARTIN) **172**, 387
Ionoregulation:
By freshwater-adapted trout (MARSHALL, BRYSON AND WOOD) **166**, 297
In a freshwater fish (GONZALEZ AND McDONALD) **163**, 317
In rainbow trout (CURTIS AND WOOD) **173**, 181
Ion-selective microelectrodes:
Used to study ion transport in insect midgut goblet cells (MOFFETT AND KOCH) **172**, 403

Ion-sensitive electrode:
Flexible, construction of (O'DONNELL) **162**, 353
Isoforms:
Of V-ATPase subunits in osteoclasts (CHATTERJEE, CHAKRABORTY, LEIT, NEFF, JAMSA-KELLOKUMPU, FUCHS, BARTKIEWICZ, HERNANDO AND BARON) **172**, 193
Of V-ATPase subunits (GOGARTEN, STARKE, KIBAK, FISHMANN AND TAIZ) **172**, 137
Isometric contraction:
The potentiating effect of prestretch (ETTEMA, HUIJING AND DE HAAN) **165**, 121
Isoniazid:
Effect on metabolism of anoxic crucian carp (NILSSON) **164**, 243
Isopod:
Water vapour absorption by *Porcellio scaber* (WRIGHT AND O'DONNELL) **164**, 189
Isoproterenol:
Effect on serine uptake by trout red blood cells (GALLARDO, PLANAS AND SÁNCHEZ) **163**, 85
Isovelocity contraction:
The potentiating effect of prestretch (ETTEMA, HUIJING AND DE HAAN) **165**, 121

***Jasus lalandii*:**
Humoral induction of rhythmic pyloric output (REZER AND MOULINS) **163**, 209
Steering reactions during the tail-flip (NEWLAND, CATTAERT, NEIL AND CLARAC) **164**, 261
Juvenile hormone:
In the development of larval *Manduca sexta* (ALLEN, HERMAN AND GRANGER) **166**, 253

K^+ channel:
In insect epithelia (ZEISKE) **172**, 323
K^+ transport:
Across locust hindgut (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 275
K^+/H^+ antiport:
In insect epithelia (ZEISKE) **172**, 323
Kainate:
Effect on membrane conductance of lobster motoneurones (HASHEMZADEH-GARGARI AND FRESCHI) **169**, 53
Keratin:
Contribution to the strength of the horse hoof (THOMASON, BIEWENER AND BERTRAM) **166**, 145
Kidney:
Biochemistry of V-ATPase (GLUCK, NELSON, LEE, WANG, GUO, FU AND ZHANG) **172**, 219
Polarity of V-ATPase in epithelial cells (BROWN, SABOLIC AND GLUCK) **172**, 231
Role in ion regulation in trout (CURTIS AND WOOD) **173**, 181
Role of V-ATPase in proton transport (GLUCK AND NELSON) **172**, 205
Killifish:
Fundulus heteroclitus, swimbladder function and buoyancy regulation (GOOLISH) **166**, 61
Kinematics:
Of a walking shore crab (HUI) **165**, 213
Of aquatic and terrestrial locomotion in salamanders (FROLICH AND BIEWENER) **162**, 107
Of feeding in a lizard (DELHEUSY AND BELS) **170**, 155
Of prey capture and tongue protraction in a tree frog (DEBAN AND NISHIKAWA) **170**, 235
Of prey capture by the snapping turtle (LAUDER AND PRENDERGAST) **164**, 55
Of rhythmical hindlimb movements in chicks (JOHNSTON AND BEKOFF) **171**, 43
Of swimming in the scup (ROME, CHOI, LUTZ AND SOSNICKI) **163**, 259
Of undulatory locomotion in a chaetognath (JORDAN) **163**, 119
Kinetics:
Of tongue projection in a feeding chameleon (WAINWRIGHT AND BENNETT) **168**, 1, 23
***Kryptopterus bicirri*:**
Sarcomere length changes during swimming (LIEBER, RAAB, KASHIN AND EDGERTON) **169**, 251

Lacewing:
Flow visualization (GRODNITSKY AND MOKOZOV) **169**, 143
L-Lactate:
Effect on lobster haemocyanin oxygen-affinity (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93; (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Levels in exercised rainbow trout (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Laminin:
Effect on growth of cultured leech Retzius cells (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1

Lamprey:
Blood gas transport (TUFTS, BAGATTO AND CAMERON) **169**, 105
Oxygen and carbon dioxide transport in blood (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
Largemouth bass:
Swimming performances of individuals are repeatable (KOLOK) **170**, 265
Larva:
Of fish, effect of temperature on swimming performance (BATTY AND BLAXTER) **170**, 187
Lateral bending:
In lizards during locomotion (RITTER) **173**, 1
Laterality:
Of lobster claws, development of (GOVIND AND PEARCE) **171**, 149
Leech:
Acetylcholine is an inhibitory transmitter in heart interneurones (SCHMIDT AND CALABRESE) **171**, 329
Embryogenesis of motoneurones (JELLIES, KOPP AND BLEDSOE) **170**, 71
Intracellular calcium concentrations in glial cells (MUNSCH AND DEITMER) **167**, 251
Neurite retraction in cultured Retzius cells after electrical activity (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1
Leg motoneurones:
In the shore crab, proprioceptive inputs (HEAD AND BUSH) **163**, 187
Leg proprioceptor:
Effect on the swimmeret rhythm in crayfish (CATTAERT, BARTHE, NEIL AND CLARAC) **169**, 181
***Leishmania*:**
Ion transport in (BAKKER-GRUNWALD) **172**, 311
Lepidoptera:
Amino acid transport across midgut of larvae (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Plant antibodies label *Manduca sexta* membranes (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
***Lepomis macrochirus*:**
Friction drag and inertial recoil in undulatory swimming (WEBB) **162**, 157
***Leptonychotes weddellii*:**
Diving metabolism (CASTELLINI, KOOYMAN AND PONGANIS) **165**, 181
Leukotrienes:
Effect on potassium transport across the carp red blood cell membrane (JENSEN) **171**, 349
Lidocaine:
Inhibits screening-pigment aggregation in frog and crayfish (MONDRAGÓN AND FRIXIONE) **166**, 197
***Ligia exotica*:**
Circadian rhythms of chromophores in the compound eye (HARIYAMA AND TSUKAHARA) **167**, 39
Linkage:
Between respiratory and locomotory movements in mammals (YOUNG, WARREN AND ALTRINGHAM) **164**, 283
***Littorina littorea*:**
Resolution and sensitivity of the eye (SEYER) **170**, 57
Lizard:
Lateral bending during locomotion (RITTER) **173**, 1
Mechanism of tongue projection in chameleons (WAINWRIGHT AND BENNETT) **168**, 1, 23
Oplurus cuvieri, kinematics of feeding behaviour (DELHEUSY AND BELS) **170**, 155
Load carrying:
Capacity of migrating birds (HEDENSTRÖM AND ALERSTAM) **164**, 19
Lobster:
Abdominal postural motor responses (SUKHDEO AND PAGE) **162**, 167
Allosteric modulation of haemocyanin (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93; (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Development of claw laterality (GOVIND AND PEARCE) **171**, 149
Effect of glutamate agonists on cardiac ganglion motoneurones (HASHEMZADEH-GARGARI AND FRESCHI) **169**, 53
Humoral induction of a rhythmic motor pattern (REZER AND MOULINS) **163**, 209
Steering during the tail-flip (NEWLAND, CATTAERT, NEIL AND CLARAC) **164**, 261
Locomotion:
Brain neurones involved in the control of walking in the cricket (BÖHM AND SCHILDBERGER) **166**, 113
Effect of temperature on swimming performance of fish larvae (BATTY AND BLAXTER) **170**, 187
Effects of cerebellar lesions on swimming performance of trout (ROBERTS, VAN ROSSEM AND DE JAGER) **167**, 171

Escape running of crickets (GRAS AND HÖRNER) **171**, 189
Lateral bending in lizards (RITTER) **173**, 1
Muscle firing patterns in arachnids (SHULTZ) **162**, 313
Muscle force and power output during flight in the starling (BIEWENER, DIAL AND GOSLOW) **164**, 1
Neural control of, in the mole rat (EILAM AND SHEFER) **173**, 155
Neural mechanism of the escape reaction in a pteropod mollusc (ARSHAVSKY, DELIAGINA, ORLOVSKY, PANCHIN AND POPOVA) **164**, 307
Neurophysiology of escape running in the cricket (HÖRNER) **171**, 215
Power output of swimming salmon (TANG AND WARDLE) **166**, 33
Rhythmical hindlimb movements in chicks (JOHNSTON AND BEKOFF) **171**, 43
Role of the body axis in a salamander (FROLICH AND BIEWENER) **162**, 107
Sarcomere length changes in swimming fish (LIEBER, RAAB, KASHIN AND EDGERTON) **169**, 251
Scaling of breathing and running in mammals (YOUNG, WARREN AND ALTRINGHAM) **164**, 283
Scaling with muscle fibres (ROME) **168**, 243
Steering during the tail-flip in the spiny lobster (NEWLAND, CATTAERT, NEIL AND CLARAC) **164**, 261
Surface strain on the equine hoof wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145
Swimming speed and depth of blue marlin (BLOCK, BOOTH AND CAREY) **166**, 267
Synchronization with ventilation in horses (YOUNG, ALEXANDER, WOAKES, BUTLER AND ANDERSON) **166**, 19
The cost of sidewinding in *Crotalus cerastes* (SECOR, JAYNE AND BENNETT) **163**, 1
The stopping response of *Xenopus* embryos (BOOTHBY AND ROBERTS) **169**, 65
Undulatory, of *Sagitta elegans* (JORDAN) **163**, 119
Walking kinematics of a shore crab (HUI) **165**, 213

Locust:
Actions of a neuropeptide that influences ileal transport (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 261, 275
Identification of neurones innervating the oviduct (KALOGIANNI AND PFLÜGER) **168**, 177
Intracellular recordings from intact insects in flight (HENSLER) **168**, 301
Mechanical scaling of the tibia (KATZ AND GOSLINE) **168**, 125
Nutrient feedback mechanisms in taste responsiveness (SIMPSON AND ABISGOLD) **168**, 269
Perception of the visual flow field (BAADER, SCHÄFER AND ROWELL) **165**, 137
Recovery from haemolymph acidosis (HARRISON, WONG AND PHILLIPS) **165**, 85; (HARRISON AND PHILLIPS) **165**, 97
Structure of the femoral chordotonal organ of the metathoracic leg (SHELTON, STEPHEN, SCOTT AND TINDALL) **163**, 345

***Locusta migratoria*:**
Innervation of the oviduct (KALOGIANNI AND PFLÜGER) **168**, 177
Intracellular recordings from intact insects in flight (HENSLER) **168**, 301
Nicotinic and muscarinic receptors on neuronal somata (BENSON) **170**, 203
Nutrient feedback mechanisms in taste responsiveness (SIMPSON AND ABISGOLD) **168**, 269
Perception of the visual flow field (BAADER, SCHÄFER AND ROWELL) **165**, 137
Serotonin-activated currents in isolated neurones (BERMUDEZ, BEADLE AND BENSON) **165**, 43
Temperature-dependence of wing-beat frequency (FOSTER AND ROBERTSON) **162**, 295
Wing movements during flight (ROBERTSON AND REYE) **163**, 231

Loft location:
Effect on pigeon homing (WALCOTT) **170**, 127

***Loligo opalescens*:**
Function of the olfactory organ (GILLY AND LUCERO) **162**, 209
Stimulation of olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231

Lung:
Function in a land crab (WILKENS AND YOUNG) **163**, 297
Of the soldier crab, functional design of (MAITLAND AND MAITLAND) **163**, 333

Lymph heart:
Of a toad, pressure, rate and flow (JONES, WENTZELL AND TOEWS) **169**, 207
Role in acid–base regulation in a hypercapnic toad (GARLAND AND TOEWS) **170**, 271

Macrophage:
Role of V-ATPases in phagocytic cells (GRINSTEIN, NANDA, LUKACS AND ROTSTEIN) **172**, 179
V-ATPase (GLUCK) **172**, 29
***Macrozoarces americanus*:**
Skin acts as an effective barrier to ice crystal propagation (VALERIO, KAO AND FLETCHER) **164**, 135
Magicicada:
Sound production by *Cyclochila australasiae* (BENNET-CLARK AND YOUNG) **173**, 123
Magnetic anomoly:
Effect on pigeon homing (WALCOTT) **170**, 127
Magnetic field:
Effect on pigeon homing (WALCOTT) **170**, 127
Magnetic sense:
Of fin whales (WALKER, KIRSCHVINK, AHMED AND DIZON) **171**, 67
Magnetoreception:
By pigeons (COUVILLON, ASAM AND BITTERMAN) **173**, 295
By the pigeon, involvement of the opioid system (PAPI, LUSCHI AND LIMONTA) **166**, 169
***Maia squinado*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
***Makaira nigricans*:**
Forces in intervertebral joints (LONG) **162**, 131
Swimming speed and depth (BLOCK, BOOTH AND CAREY) **166**, 267
Malpighian tubule:
From *Manduca sexta*, V-ATPase (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
Of the house cricket, response to diuretic hormone (COAST, HAYES, KAY AND CHUNG) **162**, 331
V-ATPase action in ion and fluid transport (MADDRELL AND O'DONNELL) **172**, 417
Mammals:
Scaling of ventilation and running (YOUNG, WARREN AND ALTRINGHAM) **164**, 283
***Manduca sexta*:**
Binding of FSBA to midgut V-ATPase (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **164**, 301
Calcium concentration in corpus allatum cells (ALLEN, HERMAN AND GRANGER) **166**, 253
Decline in function of neuromuscular junctions during metamorphosis (SONEA AND RHEUBEN) **167**, 61
Degeneration of muscle fibres during metamorphosis (RHEUBEN) **167**, 91
Degenerative changes in neuromuscular junctions during metamorphosis (RHEUBEN) **167**, 119
Diuretic hormone from, effect on house cricket Malpighian tubules (COAST, HAYES, KAY AND CHUNG) **162**, 331
Effects of cardioactive peptides in larvae and adults (TUBLITZ, CHEUNG, EDWARDS, SYLWESTER AND REYNOLDS) **165**, 265
Epithelial ion transport (KLEIN) **172**, 345
Ion currents in developing leg motoneurones (HAYASHI AND LEVINE) **171**, 15
Ion transport in midgut goblet cells (MOFFETT AND KOCH) **172**, 403
Midgut vacuolar-type ATPase, reaction with DCCD (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **165**, 273
pH gradients in midgut (DOW) **172**, 355
Potassium pump in midgut (WIECZOREK) **172**, 335
Regulation of larval hindgut activity (TUBLITZ, ALLEN, CHEUNG, EDWARDS, KIMBLE, LOI AND SYLWESTER) **165**, 241
V-ATPase of cation-transporting plasma membranes (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
Marine mammal:
Weddell seal, diving performance (CASTELLINI, KOOYMAN AND PONGANIS) **165**, 181
***Mastigoproctus giganteus*:**
Muscle firing patterns during propulsive leg extension (SHULTZ) **162**, 313
Material design:
Surface strain on the equine hoof wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145
Mathematical model:
For work rate minimization and stride frequency during walking (MINETTI AND SAIBENE) **170**, 19
Maxillary palp:
Responsiveness of taste receptors in the locust (SIMPSON AND ABISGOLD) **168**, 269
Mechanical coupling:
Dynamics of, in the fly campaniform sensilla (DICKINSON) **169**, 221
Mechanical design:
Of the locust tibia (KATZ AND GOSLINE) **168**, 125

Mechanics:
Of cod fast muscle during cyclical contractions (ANDERSON AND JOHNSTON) **170**, 143
Of insect flight muscle (PECKHAM, CRIPPS, WHITE AND BULLARD) **168**, 57
Of muscle, scaling (ROME) **168**, 243
Of red muscle in swimming scup (ROME, SOSNICKI AND CHOI) **163**, 281
Mechanoreception:
In *Vorticella* (KATOH AND NAITOH) **168**, 253
Mechanoreceptors:
In lobster claws, role in determining laterality (GOVIND AND PEARCE) **171**, 149
Responses to deflections of the fly wing (DICKINSON) **169**, 221
Medulla:
Control of impulse discharge by butterfly visual neurones (ICHIKAWA) **171**, 247
Medullary neurone:
Common mode rejection mechanism in the carpet shark (BODZNICK AND MONTGOMERY) **171**, 127
Role in electrosensory common mode signal suppression in the skate (BODZNICK, MONTGOMERY AND BRADLEY) **171**, 107
Melanophore:
Facilitation of responses in the winter flounder (BURTON AND O'DRISCOLL) **168**, 289
Membrane conductance:
Of lobster motoneurones, effects of excitatory amino acids (HASHEMZADEH-GARGARI AND FRESCHI) **169**, 53
Membrane depolarization:
Of mollusc neurones, effect of hypo-osmotic stress (QUINN AND PIERCE) **163**, 169
Membrane potential:
Response to thermal stimulation, in *Paramecium caudatum* (TOMINAGA AND NAITOH) **164**, 39
Membrane repolarization:
At presynaptic motor terminals in *Drosophila* larvae (GHO AND GANETZKY) **170**, 93
3-Mercaptopropionic acid:
Effect on metabolism of anoxic crucian carp (NILSSON) **164**, 243
Mercury:
Effect on the transmembrane sodium gradient in a mussel (BØRSETH, AUNAAS, EINARSON, NORDTUG, OLSEN AND ZACHARIASSEN) **169**, 1
Messenger RNA:
Pools in active and dormant *Artemia franciscana* embryos (HOFMANN AND HAND) **164**, 103
Metabolic depression:
In the turtle brain during anoxia (NILSSON AND LUTZ) **162**, 345
Metabolic heat production:
Role in thermoregulation in a quail (ZERBA AND WALSBERG) **171**, 409
Metabolic rate:
Of two teleosts (WIESER, LAICH AND MEDGYESY) **169**, 165
Metabolism:
Depression of, in anoxic crucian carp (NILSSON) **164**, 243
Neural regulation of pupariation in tsetse (ŽĎÁREK AND DENLINGER) **173**, 11
Of alanine by trout hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
Of amino acids by blenny embryos (KORSGAARD) **171**, 315
Of diving Weddell seals (CASTELLINI, KOOYMAN AND PONGANIS) **165**, 181
Of nitrogen in a cockroach (MULLINS, KEIL AND WHITE) **162**, 55
Of rainbow trout after exercise (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Of the eel gas gland (PELSTER AND SCHEID) **173**, 205
Metamorphosis:
Degenerative changes in neuromuscular junctions (RHEUBEN) **167**, 119
Ion currents in leg motoneurones of developing *Manduca sexta* (HAYASHI AND LEVINE) **171**, 15
Neural regulation of pupariation in tsetse (ŽĎÁREK AND DENLINGER) **173**, 11
Metathoracic leg:
Role in the phonotactic response of crickets (MILES, MAY, HOLBROOK AND HOY) **169**, 19
Metmyoglobin reductase:
In heart (BAILEY AND DRIEDZIC) **173**, 301
***Micropterus salmoides*:**
Swimming performances of individuals are repeatable (KOLOK) **170**, 265
Microtubules:
Role in polarized targeting of V-ATPase in kidney epithelial cells (BROWN, SABOLIC AND GLUCK) **172**, 231
***Mictyris longicarpus*:**
Functional design of the lung (MAITLAND AND MAITLAND) **163**, 333

Midgut:
Lepidopteran, V-ATPases (HARVEY) **172**, 1
Of insects, V-ATPase-energized epithelia (WOLFERSBERGER) **172**, 377
Of insects, V-ATPases (GLUCK) **172**, 29
Of lepidopteran larvae, glycine transport by (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Of *Manduca sexta*, binding of FSBA to V-ATPase (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **164**, 301
Of *Manduca sexta*, pH gradients (DOW) **172**, 355
Of *Manduca sexta*, potassium transport (WIECZOREK) **172**, 335
Plasma membranes from *Manduca sexta* are labelled by plant antibodies (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
Migration:
Magnetic sense of fin whales (WALKER, KIRSCHVINK, AHMED AND DIZON) **171**, 67
Mitochondria-rich cell:
In frog skin, energization of sodium absorption (HARVEY) **172**, 289
V-ATPase (GLUCK) **172**, 29
Modulation:
Of siphon sensory neurones in *Aplysia californica* by conopressin G (MARTÍNEZ-PADRÓN, EDSTROM, WICKHAM AND LUKOWIAK) **171**, 79
Of yeast calcium channels (BERTL AND SLAYMAN) **172**, 271
Mole rat:
Reversed coupling in backward locomotion (EILAM AND SHEFER) **173**, 155
Molecular genetics:
Of yeast V-ATPase (ANRAKU, HIRATA, WADA AND OHYA) **172**, 67
Mollusc:
Clione limacina, interneurones mediating the escape reaction (ARSHAVSKY, DELIAGINA, ORLOVSKY, PANCHIN AND POPOVA) **164**, 307
Colour discrimination by (NISHI AND GOTOW) **168**, 77
Effect of hypo-osmotic stress on neurones of *Elysia chlorotica* (QUINN AND PIERCE) **163**, 169
Monosynaptic connections:
Between serotonin-containing neurones in *Helix* (VEHOVSKY, KEMENES AND S.-ROZSA) **173**, 109
Mormyridae:
Specificity in the electric organ discharges (CRAWFORD) **164**, 79
Morphology:
Functional, of the equine hoof wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145
Mosquito:
Characterization of a vasodilator from saliva (RIBIERO) **165**, 73
Motoneurone:
Embryogenesis of, in leech (JELLIES, KOPP AND BLEDSOE) **170**, 71
Identified, in a cockroach, time-dependent action potential (HANCOX AND PITMAN) **162**, 251
In the femur–tibia control loop in stick insects (KITTMANN AND SCHMITZ) **173**, 91
Motor control:
Of the locust oviduct (KALOGIANNI AND PFLÜGER) **168**, 177
Motor pattern:
In walking arachnids (SHULTZ) **162**, 313
Moult cycle:
Of a crab, actin gene expression (WHITELEY, TAYLOR AND EL HAJ) **167**, 277
Moulting:
Calcium uptake by the blue crab (NEUFELD AND CAMERON) **171**, 283
Lung design in the soldier crab (MAITLAND AND MAITLAND) **163**, 333
Multigene family:
For plant V-ATPase (SZE, WARD, LAI AND PERERA) **172**, 123
Multimodal integration:
In the control of locust flight (BAADER, SCHÄFER AND ROWELL) **165**, 137
Muscarinic receptor:
On locust neuronal somata (BENSON) **170**, 203
Muscle:
Actin gene expression during growth in a crab (WHITELEY, TAYLOR AND EL HAJ) **167**, 277
Contraction of, in a sea urchin (TSUCHIYA, OBINATA, SATO, MORI, SUZUKI AND AMEMIYA) **162**, 361
Effect of prestretch on contractile performance (ETTEMA, HUIJING AND DE HAAN) **165**, 121
Effect of temperature on power output in scup (ROME AND SWANK) **171**, 261
Firing patterns in walking arachnids (SHULTZ) **162**, 313
For insect flight, mechanics and protein content (PECKHAM, CRIPPS, WHITE AND BULLARD) **168**, 57
In squid, biochemistry of (KIER AND SCHACHAT) **168**, 41

Mechanism of tongue projection in chameleons (WAINWRIGHT AND BENNETT) **168**, 1, 23
Of *Ascaris suum*, voltage-activated currents (MARTIN, THORN, GRATION AND HARROW) **173**, 75
Of cod, scaling of power output during cyclical contractions (ANDERSON AND JOHNSTON) **170**, 143
Of sea anemones, actions of Antho-RNamide (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295
pH and carbon dioxide content in trout after exercise (TANG, LIN AND RANDALL) **169**, 235
Power output of swimming salmon (TANG AND WARDLE) **166**, 33
Red, mechanics of, in swimming scup (ROME, SOSNICKI AND CHOI) **163**, 281
Scaling of mechanics and energetics (ROME) **168**, 243
Shortening velocity during swimming in the scup (ROME, CHOI, LUTZ AND SOSNICKI) **163**, 259
Work of migrating birds (HEDENSTRÖM AND ALERSTAM) **164**, 19

Muscle fibre:
Degenerative changes during metamorphosis (RHEUBEN) **167**, 91

Muscle fibre types:
Recruitment of (ROME) **168**, 243

Muscle receptor organ:
Role in postural reflexes in a lobster (SUKHDEO AND PAGE) **162**, 167

Muscular hydrostat:
Mechanism of tongue projection in chameleons (WAINWRIGHT AND BENNETT) **168**, 23

Mussel:
Depression of the transmembrane sodium gradient (BØRSETH, AUNAAS, EINARSON, NORDTUG, OLSEN AND ZACHARIASSEN) **169**, 1

Mutations:
In the yeast V-ATPase (KLIONSKY, NELSON, NELSON AND YAVER) **172**, 83

Myoactive peptides:
Effects on larval and adult *Manduca sexta* (TUBLITZ, CHEUNG, EDWARDS, SYLWESTER AND REYNOLDS) **165**, 265

Myocardium:
Effects of temperature and ryanodine on trout (HOVE-MADSEN) **167**, 47

Myofilament:
Length changes in swimming fish (LIEBER, RAAB, KASHIN AND EDGERTON) **169**, 251

Myoglobin:
Cardiac, role of (BAILEY AND DRIEDZIC) **173**, 301

***Mytilus californianus*:**
Taurine transport across the gill integument (SILVA AND WRIGHT) **162**, 265

***Mytilus edulis*:**
Depression of the transmembrane sodium gradient (BØRSETH, AUNAAS, EINARSON, NORDTUG, OLSEN AND ZACHARIASSEN) **169**, 1
Taurine transport across the gill integument (SILVA AND WRIGHT) **162**, 265

Na^+ absorption:
By mitochondria-rich cells of frog skin (HARVEY) **172**, 289

Na^+/Ca^{2+} exchange:
In fish enterocytes and dog erythrocytes (SCHOENMAKERS AND FLIK) **168**, 151

Na^+/H^+ exchange:
In eel and trout erythrocytes (PERRY AND REID) **167**, 235

$Na^+(H^+)/NH_4^+$ exchange:
In trout exposed to varying salinity (WILSON AND TAYLOR) **166**, 95

Na^+ transport:
Across locust hindgut (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 275

Navigation:
Effect of anosmia on homing performance of pigeons (SCHLUND) **164**, 171
Magnetic treatment affects the pigeon opioid system (PAPI, LUSCHI AND LIMONTA) **166**, 169

***Necora puber*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257

Neural control:
Of locomotion, in the mole rat (EILAM AND SHEFER) **173**, 155
Of pupariation in tsetse (ŽĎÁREK AND DENLINGER) **173**, 11

Neurogenetics:
Of *Drosophila* larvae (GHO AND GANETZKY) **170**, 93

Neuromodulation:
Of contractions of the locust oviduct (KALOGIANNI AND PFLÜGER) **168**, 177

Neuromuscular junction:
Decline in function during metamorphosis (SONEA AND RHEUBEN) **167**, 61
Degenerative changes during metamorphosis (RHEUBEN) **167**, 119

Neuronal oscillators:
In the lobster stomatogastric system (REZER AND MOULINS) **163**, 209
Neurone:
Serotonin-activated currents in locust (BERMUDEZ, BEADLE AND BENSON) **165**, 43
Neuropeptide:
Actions of Antho-RNamide on sea anemone muscle (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295
Effect on blood flow to the dogfish gut (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Effect on branchial blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Effects in larval and adult *Manduca sexta* (TUBLITZ, CHEUNG, EDWARDS, SYLWESTER AND REYNOLDS) **165**, 265
From locust corpus cardiacum, actions of (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 261, 275
Regulation of hindgut activity in *Manduca sexta* larvae (TUBLITZ, ALLEN, CHEUNG, EDWARDS, KIMBLE, LOI AND SYLWESTER) **165**, 241
Neurophysiology:
Of dietary selection by *Spodoptera littoralis* (SIMMONDS, SIMPSON AND BLANEY) **162**, 73
Neuropile:
Oscillatory olfactory interneurones in the protocerebrum of crayfish (MELLON, SANDEMAN AND SANDEMAN) **167**, 15
***Neurospora crassa*:**
V-ATPase (BOWMAN, DSCHIDA AND BOWMAN) **172**, 57; (STEVENS) **172**, 47
Neurotransmitter:
Concentration of, in synaptic vesicles, role of V-ATPase (MORIYAMA, MAEDA AND FUTAI) **172**, 171
Serotonin-activated currents in locust neurones (BERMUDEZ, BEADLE AND BENSON) **165**, 43
Neutrophil:
Role of V-ATPases in phagocytic cells (GRINSTEIN, NANDA, LUKACS AND ROTSTEIN) **172**, 179
V-ATPase (GLUCK) **172**, 29
Nicotinic acetylcholine receptor:
On an insect neurone, effect of dithiothreitol (LEECH, BAI AND SATTELLE) **169**, 267
Nicotinic receptor:
On locust neuronal somata (BENSON) **170**, 203
Nitrate:
Sensitivity to, of halobacterial A-ATPase (IHARA, ABE, SUGIMURA AND MUKOHATA) **172**, 475
Nitrogen:
Excretion of, by acidotic locusts (HARRISON AND PHILLIPS) **165**, 97
Parental investment of, in a cockroach (MULLINS, KEIL AND WHITE) **162**, 55
Noise:
Suppression of, in the electrosensory system of the carpet shark (BODZNICK AND MONTGOMERY) **171**, 127
Suppression of, in the electrosensory system of the skate (BODZNICK, MONTGOMERY AND BRADLEY) **171**, 107
Noradrenaline:
Effect on blood flow to the dogfish gut (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Nursery lake:
For salmonids, photic environment (NOVALES-FLAMARIQUE, HENDRY AND HAWRYSHYN) **169**, 121

Ocean pout:
Skin acts as an effective barrier to ice crystal propagation (VALERIO, KAO AND FLETCHER) **164**, 135
Ocular tracking:
By stomatopod eyes (CRONIN, YAN AND BIDLE) **171**, 373
Olfaction:
Chemical stimulation of squid receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231
Effect of intranasal zinc sulphate irrigation on homing performance of pigeons (SCHLUND) **164**, 171
Responses of squid to chemical stimuli (GILLY AND LUCERO) **162**, 209
Olfactory receptor cell:
In salmon, ionic conductances (NEVITT AND MOODY) **166**, 1
Ommatidia:
In stomatopod eyes, role in ocular tracking (CRONIN, YAN AND BIDLE) **171**, 373
***Onchidium verraculatum*:**
Extra-ocular processing of colour information (NISHI AND GOTOW) **168**, 77
***Oncorhynchus kisutch*:**
Ionic conductances in olfactory receptor cells (NEVITT AND MOODY) **166**, 1

***Oncorhynchus mykiss*:**
Acid–base and ion regulation (CURTIS AND WOOD) **173**, 181
Acid–base regulation during hypercapnia (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43
Adrenergic responses of erythrocytes (PERRY AND REID) **167**, 235
Ammonia excretion and permeability (WILSON AND TAYLOR) **166**, 95
Calcium transport by isolated skin (MARSHALL, BRYSON AND WOOD) **166**, 297
Cardiorespiratory effects of serotonin (FRITSCHE, THOMAS AND PERRY) **173**, 59
Compartmental distribution of carbon dioxide and ammonia (TANG, LIN AND RANDALL) **169**, 235
Control of stomach volume (GROVE AND HOLMGREN) **163**, 49
Dimensional analysis of the ventricle using echocardiography (FRANKLIN AND DAVIE) **166**, 47
Effect of splenectomy on swimming performance (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
Effects of cerebellar lesions on swimming performance (ROBERTS, VAN ROSSEM AND DE JAGER) **167**, 171
Effects of temperature and ryanodine on myocardium (HOVE-MADSEN) **167**, 47
Gas exchange and metabolism after exercise (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Oxygen consumption and ion regulation in fresh water (GONZALEZ AND McDONALD) **163**, 317
Post-exercise recovery of white muscle (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Sexual maturity induces heart growth (FRANKLIN AND DAVIE) **171**, 139

Opiate receptors:
In the pigeon brain, role in navigation (PAPI, LUSCHI AND LIMONTA) **166**, 169

***Oplurus cuvieri*:**
Kinematics of feeding behaviour (DELHEUSY AND BELS) **170**, 155

Optics:
Of the eye of the winkle (SEYER) **170**, 57

***Oreochromis mossambicus*:**
Na^+/Ca^{2+} exchangers in basolateral plasma membranes from enterocytes (SCHOENMAKERS AND FLIK) **168**, 151

Orientation:
Escape behaviour in the cricket (HÖRNER) **171**, 215
Of hatchling sea turtles (LOHMANN AND LOHMANN) **171**, 1

Orientation behaviour:
Of a walking cricket (BÖHM AND SCHILDBERGER) **166**, 113

Osmolality:
Of pleon fluid in *Porcellio scaber* (WRIGHT AND O'DONNELL) **164**, 189

Osmo-respiratory compromise:
In freshwater fish (GONZALEZ AND McDONALD) **163**, 317

Osteoclast:
V-ATPase (GLUCK) **172**, 29
V-ATPase of a novel type (CHATTERJEE, CHAKRABORTY, LEIT, NEFF, JAMSA-KELLOKUMPU, FUCHS, BARTKIEWICZ, HERNANDO AND BARON) **172**, 193

Oviduct:
Innervation of, in the locust (KALOGIANNI AND PFLÜGER) **168**, 177

Oxygen:
In trout blood, effect of splenectomy (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
Transport of, in lamprey blood (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25

Oxygen affinity:
Of crustacean blood (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257

Oxygen consumption:
By diving tufted ducks (BEVAN AND BUTLER) **163**, 139
By exercising quails (ZERBA AND WALSBERG) **171**, 409
By two teleosts (WIESER, LAICH AND MEDGYESY) **169**, 165
During diving in aquatic birds (BEVAN, KEIJER AND BUTLER) **162**, 91
In exercised juvenile rainbow trout (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Of a sidewinding snake (SECOR, JAYNE AND BENNETT) **163**, 1
Of hypoxic sturgeon, effects of diet (RANDALL, McKENZIE, ABRAMI, BONDIOLOTTI, NATIELLO, BRONZI, BOLIS AND AGRADI) **170**, 113

Oxygen equilibrium curve:
For lobster haemocyanin, allosteric modulation of (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93

Oxygen uptake:
By a torpid bat during apnoea (SZEWCZAK AND JACKSON) **173**, 217
By aquatic skin-breathing amphibians, effect of the hypoxic boundary layer (FEDER AND BOOTH) **166**, 237
Of swimming brown trout, effect of temperature and pH (BUTLER, DAY AND NAMBA) **165**, 195
Of swimming sea lions (BUTLER, WOAKES, BOYD AND KANATOUS) **170**, 35

***Pachygrapsus crassipes*:**
Kinematics of walking (HUI) **165**, 213
***Pacifastacus leniusculus*:**
Control of the swimmeret rhythm (CATTAERT, BARTHE, NEIL AND CLARAC) **169**, 181
***Pagothenia bernacchii*:**
Cardiovascular responses (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
***Pagothenia borchgrevinki*:**
Cardiovascular responses (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
***Pandinus imperator*:**
Muscle firing patterns during propulsive leg extension (SHULTZ) **162**, 313
***Papilio xuthus*:**
Visual system, control of impulse discharge by the surround (ICHIKAWA) **171**, 247
***Parabuteo unicinctus*:**
Gliding flight (TUCKER) **165**, 21
Profile drag of the wing (PENNYCUICK, HEINE, KIRKPATRICK AND FULLER) **165**, 1
***Paramecium caudatum*:**
Control of thermoaccumulation (TOMINAGA AND NAITOH) **164**, 39
Gravity-induced changes in propulsion (OOYA, MOGAMI, IZUMI-KUROTANI AND BABA) **163**, 153
Paramyosin:
Function in squid muscle (KIER AND SCHACHAT) **168**, 41
In sea urchin muscle (TSUCHIYA, OBINATA, SATO, MORI, SUZUKI AND AMEMIYA) **162**, 361
Parasite:
Ion transport in protozoa (BAKKER-GRUNWALD) **172**, 311
Parental investment:
Of nitrogen, in a cockroach (MULLINS, KEIL AND WHITE) **162**, 55
Patch-clamp technique:
Used to study ionic conductances in salmon olfactory receptor cells (NEVITT AND MOODY) **166**, 1
Used to study responses of squid olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231
Used to study the effects of deltamethrin on cockroach neurones (AMAR, PICHON AND INOUE) **163**, 65
Pectoralis:
Force and power output during flight in the starling (BIEWENER, DIAL AND GOSLOW) **164**, 1
Penguin:
Emperor, diving performance (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LEMAHO) **165**, 161
***Perca fluviatilis*:**
Detection of infrasound (KARLSEN) **171**, 163
Perch:
Detection of infrasound (KARLSEN) **171**, 163
Performance:
Of muscle, potentiating effect of prestretch (ETTEMA, HUIJING AND DE HAAN) **165**, 121
Perfusion:
Of the eel swimbladder, gas deposition (PELSTER AND SCHEID) **173**, 205
Peripheral nerve:
Effect of a glutamate uptake inhibitor on a squid Schwann cell (EVANS, REALE, MERZON AND VILLEGAS) **173**, 251
NMDA and non-NMDA receptors on a squid Schwann cell (EVANS, REALE, MERZON AND VILLEGAS) **173**, 229
***Periplaneta americana*:**
Effect of deltamethrin on cultured neurones (AMAR, PICHON AND INOUE) **163**, 65
Effect of dithiothreitol on acetylcholine receptors (LEECH, BAI AND SATTELLE) **169**, 267
Pronotal water permeability (MACHIN, KESTLER AND LAMPERT) **171**, 395
Time-dependent action potentials in an identified motoneurone (HANCOX AND PITMAN) **162**, 251
Permeability:
To water, of the pronotum of *Periplaneta americana* (MACHIN, KESTLER AND LAMPERT) **171**, 395
***Petromyzon marinus*:**
Blood gas transport (TUFTS, BAGATTO AND CAMERON) **169**, 105
Transport of blood gases (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25

pH:
Effect on swimming performance of brown trout (BUTLER, DAY AND NAMBA) **165**, 195
In goblet cells of *Manduca sexta* midgut (DOW) **172**, 355
In lamprey plasma and red blood cells (FERGUSON, SEHDEV, BAGATTO AND TUFTS) **173**, 25
Intracellular, in dormant *Artemia franciscana* (HOFFMANN AND HAND) **164**, 103.
Intracellular, in insect midgut goblet cells (MOFFETT AND KOCH) **172**, 403
Intracellular, of mitochondria-rich cells of frog skin (HARVEY) **172**, 289
Intracellullar, in trout after exercise (TANG, LIN AND RANDALL) **169**, 235
Measurement of, with flexible ion-sensitive electrodes (O'DONNELL) **162**, 353
Pharmacology:
Of osteoclast V-ATPase (CHATTERJEE, CHAKRABORTY, LEIT, NEFF, JAMSA-KELLOKUMPU, FUCHS, BARTKIEWICZ, HERNANDO AND BARON) **172**, 193
***Philosamia cynthia*:**
Cation-driven transport by larval midgut (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Phonotaxis:
Of crickets (MILES, MAY, HOLBROOK AND HOY) **169**, 19
Phosphocreatine:
Levels in trout white muscle during recovery from exercise (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Photo-oxidative stress:
Effect on oxyradical production in a symbiosis (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
Photoreceptor:
Circadian rhythms of the chromophores in a crustacean compound eye (HARIYAMA AND TSUKAHARA) **167**, 39
Extra-ocular, in a mollusc, properties of (NISHI AND GOTOW) **168**, 77
In crayfish, screening-pigment aggregation (MONDRAGÓN AND FRIXIONE) **166**, 197
Of juvenile salmonid retinae (NOVALES-FLAMARIQUE, HENDRY AND HAWRYSHYN) **169**, 121
Photosynthesis:
Partial reactions of the proton with F-ATPase (JUNGE, ENGELBRECHT, GRIWATZ AND GROTH) **172**, 461
Phylogenetic analysis:
Of V-ATPase isoforms (GOGARTEN, STARKE, KIBAK, FISHMANN AND TAIZ) **172**, 137
***Pieris rapae*:**
Fluid secretion by Malpighian tubules (COAST, HAYES, KAY AND CHUNG) **162**, 331
Pigeon:
Effect of hypothermia on ventilation and air-sac gases (JENSEN AND BECH) **165**, 111
Effect of intranasal zinc sulphate irrigation on homing (SCHLUND) **164**, 171
Effects of loft location on homing (WALCOTT) **170**, 127
Magnetic conditioning (COUVILLON, ASAM AND BITTERMAN) **173**, 295
Role of the brain opioid system in navigation (PAPI, LUSCHI AND LIMONTA) **166**, 169
Thermosensitivity of the spinal cord (ØSTNES AND BECH) **162**, 185
Pigment:
Aggregation of, in frog retinal epithelium (MONDRAGÓN AND FRIXIONE) **166**, 197
Pike:
Energy partitioning (WIESER, LAICH AND MEDGYESY) **169**, 165
Pitch:
Of the wing of a gliding hawk (TUCKER) **165**, 21
Plaice:
Detection of infrasound (KARLSEN) **171**, 173
Effect of temperature on swimming performance (BATTY AND BLAXTER) **170**, 187
Plant:
Subunit organization and multigene family for V-ATPase (SZE, WARD, LAI AND PERERA) **172**, 123
V-ATPases (TAIZ) **172**, 113
Plasma:
Role in blood gas transport in the lamprey (TUFTS, BAGATTO AND CAMERON) **169**, 105
Plasma membrane:
Of insect midgut, potassium transport (WIECZOREK) **172**, 335
Of insects, ion transport (KLEIN) **172**, 345
***Plasmodium*:**
Ion transport in (BAKKER-GRUNWALD) **172**, 311
Plateau potential:
In an identified cockroach motoneurone (HANCOX AND PITMAN) **162**, 251
Pleon fluid:
Of *Porcellio scaber*, composition of (WRIGHT AND O'DONNELL) **164**, 189

Pleoventral chamber:
Of *Porcellio scaber*, secretion of fluid into (WRIGHT AND O'DONNELL) **164**, 189
***Pleuronectes platessa*:**
Detection of infrasound (KARLSEN) **171**, 173
Effect of temperature on swimming performance (BATTY AND BLAXTER) **170**, 187
***Pollimyrus isidori*:**
Specificity in the electric organ discharges (CRAWFORD) **164**, 79
Polychaeta:
Induction of spawning in the male lugworm (PACEY AND BENTLEY) **173**, 165
Polyunsaturated fatty acids:
In the diet, effects on responses of sturgeon to hypoxia (RANDALL, McKENZIE, ABRAMI, BONDIOLOTTI, NATIELLO, BRONZI, BOLIS AND AGRADI) **170**, 113
***Porcellio scaber*:**
Composition of pleon fluid and water vapour absorption (WRIGHT AND O'DONNELL) **164**, 189
Portasome:
In insect cation-transporting plasma membranes (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
Postural reflex:
In a lobster, role of the muscle stretch receptor organ (SUKHDEO AND PAGE) **162**, 167
Posture:
Control of, in stick insects (KITTMANN AND SCHMITZ) **173**, 91
Potassium:
Measurement of, with flexible ion-sensitive electrodes (O'DONNELL) **162**, 353
Potassium current:
At motor terminals in *Drosophila* larvae (GHO AND GANETZKY) **170**, 93
In *Aplysia californica* sensory neurones, modulation by conopressin G (MARTÍNEZ-PADRÓN, EDSTROM, WICKHAM AND LUKOWIAK) **171**, 79
In *Ascaris suum* muscle (MARTIN, THORN, GRATION AND HARROW) **173**, 75
In leg motoneurones from developing *Manduca sexta* (HAYASHI AND LEVINE) **171**, 15
Potassium pump:
In insect midgut (WIECZOREK) **172**, 335
Potassium transport:
Across insect midgut goblet cells (MOFFETT AND KOCH) **172**, 403
Across the carp red cell membrane (JENSEN) **171**, 349
Potentiation:
Of muscle contractile performance by prestretch (ETTEMA, HUIJING AND DE HAAN) **165**, 121
Power:
For flight, of migrating birds (HEDENSTRÖM AND ALERSTAM) **164**, 19
Power output:
Of scup muscle, effect of temperature (ROME AND SWANK) **171**, 261
Of swimming salmon (TANG AND WARDLE) **166**, 33
Of the pectoralis in flying starlings (BIEWENER, DIAL AND GOSLOW) **164**, 1
Pressure:
In the toad lymph heart (JONES, WENTZELL AND TOEWS) **169**, 207
Prestretch:
Effect on the contractile performance of rat muscle (ETTEMA, HUIJING AND DE HAAN) **165**, 121
Prey capture:
By the snapping turtle, kinematics (LAUDER AND PRENDERGAST) **164**, 55
Kinematics of, in a tree frog (DEBAN AND NISHIKAWA) **170**, 235
Stomach temperature in the feeding albatross (WILSON, COOPER AND PLÖTZ) **167**, 267
Primary feathers:
Role in gliding in a hawk (TUCKER) **165**, 21
Principal cells:
In frog skin, energization of sodium absorption (HARVEY) **172**, 289
***Procambarus clarkii*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
Behavioural responses to light (FERNÁNDEZ-DE-MIGUEL AND ARÉCHIGA) **164**, 153
Control of the swimmeret rhythm (CATTAERT, BARTHE, NEIL AND CLARAC) **169**, 181
Inhibition of screening-pigment aggregation (MONDRAGÓN AND FRIXIONE) **166**, 197
Oscillatory olfactory interneurones (MELLON, SANDEMAN AND SANDEMAN) **167**, 15

Progenote:
Of V-ATPase (GOGARTEN, STARKE, KIBAK, FISHMANN AND TAIZ) **172**, 137
Projection neurone:
In the central olfactory pathway of the crayfish (MELLON, SANDEMAN AND SANDEMAN) **167**, 15
Pronotum:
Of *Periplaneta americana*, permeability to water (MACHIN, KESTLER AND LAMPERT) **171**, 395
Proprioception:
Femoral chordotonal organ in stick insects (KITTMANN AND SCHMITZ) **173**, 91
Proprioceptors:
Inputs to crab leg motoneurones (HEAD AND BUSH) **163**, 187
Prostaglandins:
Effect on potassium transport across the carp red blood cell membrane (JENSEN) **171**, 349
Protein content:
Of insect flight muscles (PECKHAM, CRIPPS, WHITE AND BULLARD) **168**, 57
Protein sorting:
Effect of mutations in the yeast V-ATPase (KLIONSKY, NELSON, NELSON AND YAVER) **172**, 83
Proton:
Partial reactions of, in chloroplast F-ATPase (JUNGE, ENGELBRECHT, GRIWATZ AND GROTH) **172**, 461
Proton channel:
In membranes of phagocytic cells (GRINSTEIN, NANDA, LUKACS AND ROTSTEIN) **172**, 179
Proton pump:
In plant endomembranes (SZE, WARD, LAI AND PERERA) **172**, 123
Polarization of V-ATPase in kidney epithelial cells (BROWN, SABOLIC AND GLUCK) **172**, 231
Proton pumping:
By V-ATPases (NELSON) **172**, 19
Proton transport:
Function of renal V-ATPase (GLUCK, NELSON, LEE, WANG, GUO, FU AND ZHANG) **172**, 219
In kidney epithelia, role of V-ATPase (GLUCK AND NELSON) **172**, 205
Proton-motive force:
In chloroplasts, role of F-ATPase (JUNGE, ENGELBRECHT, GRIWATZ AND GROTH) **172**, 461
Protozoa:
Parasitic, ion transport in (BAKKER-GRUNWALD) **172**, 311
***Pseudemys scripta*:**
Anoxic survival (NILSSON AND LUTZ) **162**, 345
***Pseudemys scripta elegans*:**
Freeze tolerance (CHURCHILL AND STOREY) **167**, 221
***Pseudmonas* sp.:**
In cystic fibrosis (AL-AWQATI, BARASCH AND LANDRY) **172**, 245
***Pseudopleuronectes americanus*:**
Facilitation of melanophore responses (BURTON AND O'DRISCOLL) **168**, 289
Skin acts as an effective barrier to ice crystal propagation (VALERIO, KAO AND FLETCHER) **164**, 135
***Pteronotus parnelli*:**
Ultrasonic vocalizations (LANCASTER, KEATING AND HENSON) **173**, 43
Pumping capacity:
Of carp heart, effect of season and temperature (MATIKAINEN AND VORNANEN) **167**, 203
Pupal diapause:
In the flesh fly, deposition of hydrocarbons (YODER AND DENLINGER) **162**, 339
Pupariation:
Neural regulation of, in tsetse (ŽĎÁREK AND DENLINGER) **173**, 11
Purine nucleotide cycle:
Role in the recovery from exercise of trout white muscle (SCHULTE, MOYES AND HOCHACHKA) **166**, 181

Quail:
Thermoregulation (ZERBA AND WALSBERG) **171**, 409
Quisqualate:
Effect on membrane conductance of lobster motoneurones (HASHEMZADEH-GARGARI AND FRESCH) **169**, 53

Radiological imaging:
Of blood flow distribution in diving ducks (STEPHENSON AND JONES) **166**, 285
Radiotelemetry:
Used to monitor ultrasonic vocalizations of flying bats (LANCASTER, KEATING AND HENSON) **173**, 43
Rainbow trout:
Acid–base and ion regulation (CURTIS AND WOOD) **173**, 181
Acid–base regulation during hypercapnia (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43
Ammonia excretion and permeability (WILSON AND TAYLOR) **166**, 95

Calcium transport by isolated skin (MARSHALL, BRYSON AND WOOD) **166**, 297
Cardiorespiratory effects of serotonin (FRITSCHE, THOMAS AND PERRY) **173**, 59
Compartmental distribution of carbon dioxide and ammonia (TANG, LIN AND RANDALL) **169**, 235
Control of stomach volume (GROVE AND HOLMGREN) **163**, 49
Effect of splenectomy on swimming performance (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
Effects of temperature and ryanodine on myocardium (HOVE-MADSEN) **167**, 47
Gas exchange and metabolism after exercise (SCARABELLO, HEIGENHAUSER AND WOOD) **167**, 155
Oxygen consumption and ion loss in fresh water (GONZALEZ AND McDONALD) **163**, 317
Post-exercise recovery of white muscle (SCHULTE, MOYES AND HOCHACHKA) **166**, 181
Sexual maturity induces heart growth (FRANKLIN AND DAVIE) **171**, 139

***Raja erinacea*:**
Electrosensory common mode signal suppression (BODZNICK, MONTGOMERY AND BRADLEY) **171**, 107

***Rana catesbeiana*:**
Ionic basis of the sugar-induced receptor potential (OKADA, MIYAMOTO AND SATO) **162**, 23

***Rana pipiens*:**
Inhibition of screening-pigment aggregation (MONDRAGÓN AND FRIXIONE) **166**, 197

Rat:
Potentiation of muscle performance by prestretch (ETTEMA, HUIJING AND DE HAAN) **165**, 121

Receptive field:
Of the butterfly visual system, surround inhibition (ICHIKAWA) **171**, 247

Receptor:
Nicotinic and muscarinic, on locust neuronal somata (BENSON) **170**, 203
Role in endocytosis (MELLMAN) **172**, 39

Receptor cell:
Olfactory, in salmon, ionic conductances in (NEVITT AND MOODY) **166**, 1

Receptor potential:
Ionic basis of, in the frog taste cell (OKADA, MIYAMOTO AND SATO) **162**, 23

Recognition:
Of individual fish, specificity in the electric organ discharges of mormyrids (CRAWFORD) **164**, 79

Recoil:
Inertial, in undulatory swimming (WEBB) **162**, 157

Rectum:
Of locust, actions of a neuropeptide that influences Cl^- transport (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 275

Red blood cell:
Of the carp, potassium transport by (JENSEN) **171**, 349
Of trout, uptake of L-serine (GALLARDO, PLANAS AND SÁNCHEZ) **163**, 85

Reflex activity:
Role in determining claw laterality in the lobster (GOVIND AND PEARCE) **171**, 149

Reflex reversal:
Postural, in a lobster (SUKHDEO AND PAGE) **162**, 167

Reflexes:
Intrajoint and interjoint, in the shore crab (HEAD AND BUSH) **163**, 187

Regulation:
Of intracellular transport (SLAYMAN) **172**, 267
Of proton transport by the F-ATPase from *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Of V-ATPase function in coated vesicles (FORGAC) **172**, 155

Regulatory proteins:
Effect on renal V-ATPase (GLUCK, NELSON, LEE, WANG, GUO, FU AND ZHANG) **172**, 219

Remodelling:
Of mature bone, exercise-induced (LOITZ AND ZERNICKE) **170**, 1

Reptile:
Orientation of hatchling sea turtles to waves (LOHMANN AND LOHMANN) **171**, 1

Resilience:
Of the locust tibia (KATZ AND GOSLINE) **168**, 125

Resistance reflex:
In the femur–tibia control loop in stick insects (KITTMANN AND SCHMITZ) **173**, 91

Resolution:
Of the eye of the winkle (SEYER) **170**, 57
Of the eyes of a ctenid spider (LAND AND BARTH) **164**, 227

Respiration:
Effect of exercise in a crab (HAMILTON AND HOULIHAN) **162**, 37
Effect of serotonin in trout (FRITSCHE, THOMAS AND PERRY) **173**, 59
Response enhancement:
In winter flounder melanophores (BURTON AND O'DRISCOLL) **168**, 289
Reticulospinal neurones:
Role in the stopping response of *Xenopus* embryos (BOOTHBY AND ROBERTS) **169**, 65
Retina:
Structure and function of, in a ctenid spider (LAND AND BARTH) **164**, 227
Retinal:
Circadian rhythms in the compound eye of *Ligia exotica* (HARIYAMA AND TSUKAHARA) **167**, 39
Retzius cell:
In culture, retraction of neurites after electrical activity (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1
Reynolds number:
Intermediate values for a swimming chaetognath (JORDAN) **163**, 119
***Rhodnius prolixus*:**
V-ATPase action in ion and fluid transport (MADDRELL AND O'DONNELL) **172**, 417
Rhythmic motor activity:
Control of, in a snail (YOSHIDA AND KOBAYASHI) **164**, 117
RNA:
Messenger, pools in active and dormant brine shrimp embryos (HOFMANN AND HAND) **164**, 103
Rotation:
Of a sperm around its long axis (ISHIJIMA, HAMAGUCHI, NARUSE, ISHIJIMA AND HAMAGUCHI) **163**, 15
Running:
Synchronization with ventilation in horses (YOUNG, ALEXANDER, WOAKES, BUTLER AND ANDERSON) **166**, 19
Ryanodine:
Effect on trout myocardium (HOVE-MADSEN) **167**, 47

***Saccharomyces cerevisiae*:**
A conserved 95–120 kDa subunit essential for V-ATPase activity (MANOLSON, PROTEAU AND JONES) **172**, 105
Effect of V-ATPase mutations on the localization of vacuolar proteins (KLIONSKY, NELSON, NELSON AND YAVER) **172**, 83
Modulation of calcium channels (BERTL AND SLAYMAN) **172**, 271
Molecular genetics of V-ATPase (ANRAKU, HIRATA, WADA AND OHYA) **172**, 67
Vacuolar V-ATPase (STEVENS) **172**, 47
***Sagitta elegans*:**
Undulatory locomotion (JORDAN) **163**, 119
Salamander:
Effect of the hypoxic boundary layer on cutaneous gas exchange (FEDER AND BOOTH) **166**, 237
Lateral bending during locomotion (RITTER) **173**, 1
Role of the body axis in locomotion (FROLICH AND BIEWENER) **162**, 107
Salinity:
Effect on ammonia excretion and permeability of trout (WILSON AND TAYLOR) **166**, 95
Effect on integumental taurine transport in a mussel (SILVA AND WRIGHT) **162**, 265
Effect on the response of cod to hypoxia (CLAIREAUX AND DUTIL) **163**, 97
Effect on the uptake of calcium by postmoult crabs (NEUFELD AND CAMERON) **171**, 283
Saliva:
From a mosquito, properties of a vasodilator (RIBIERO) **165**, 73
***Salmo salar*:**
Swimming power (TANG AND WARDLE) **166**, 33
***Salmo trutta*:**
Effect of isoproterenol on serine uptake by red blood cells (GALLARDO, PLANAS AND SÁNCHEZ) **163**, 85
Metabolism of alanine by hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
Swimming performance (BUTLER, DAY AND NAMBA) **165**, 195
Salmon:
Ionic conductances in olfactory receptor cells (NEVITT AND MOODY) **166**, 1
Swimming power (TANG AND WARDLE) **166**, 33
Salmonids:
Photic environment of a nursery lake (NOVALES-FLAMARIQUE, HENDRY AND HAWRYSHYN) **169**, 121
Salt:
Excretion of, by insects (ZEISKE) **172**, 323
***Salvelinus alpinus*:**
Effects of stress and starvation on brain serotonin (WINBERG, NILSSON AND OLSÉN) **165**, 229

Sarcomere:
Length changes during fish swimming (LIEBER, RAAB, KASHIN AND EDGERTON) **169**, 251

***Sarcophaga crassipalpis*:**
Deposition of puparial hydrocarbons (YODER AND DENLINGER) **162**, 339

Sarcoplasmic reticulum:
Contribution to excitation–contraction coupling in trout myocardium (HOVE-MADSEN) **167**, 47

Scaling:
Of breathing and running in mammals (YOUNG, WARREN AND ALTRINGHAM) **164**, 283
Of muscle fibres and locomotion (ROME) **168**, 243
Of muscle power output in swimming cod (ANDERSON AND JOHNSTON) **170**, 143
Ontogenetic, in locust tibia (KATZ AND GOSLINE) **168**, 125

***Schistocerca gregaria*:**
Acid transfer to the alimentary lumen (HARRISON, WONG AND PHILLIPS) **165**, 85; (HARRISON AND PHILLIPS) **165**, 97
Actions of a neuropeptide that influences ileal transport (AUDSLEY, McINTOSH AND PHILLIPS) **173**, 261, 275
Innervation of the oviduct (KALOGIANNI AND PFLÜGER) **168**, 177
Mechanical scaling in the tibia (KATZ AND GOSLINE) **168**, 125
The apodeme complex of the femoral chordotonal organ of the metathoracic leg (SHELTON, STEPHEN, SCOTT AND TINDALL) **163**, 345

Scoloparia:
In the femoral chordotonal organ of stick insects (KITTMANN AND SCHMITZ) **173**, 91

Scup:
Effect of temperature on muscle power output (ROME AND SWANK) **171**, 261
Influence of temperature on muscle function during swimming (ROME, CHOI, LUTZ AND SOSNICKI) **163**, 259; (ROME, SOSNICKI AND CHOI) **163**, 281

Sea anemone:
Actions of Antho-RNamide on antagonistic muscle groups (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295
Production of oxyradicals by (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219

Sea lion:
Heart rate and oxygen consumption during swimming (BUTLER, WOAKES, BOYD AND KANATOUS) **170**, 35

Sea urchin:
Muscle contraction (TSUCHIYA, OBINATA, SATO, MORI, SUZUKI AND AMEMIYA) **162**, 361

Seal:
Diving performance (CASTELLINI, KOOYMAN AND PONGANIS) **165**, 181

Seasonal acclimatization:
Effect on function of carp heart (MATIKAINEN AND VORNANEN) **167**, 203

Second messengers:
In corpus allatum cells of *Manduca sexta* larvae (ALLEN, HERMAN AND GRANGER) **166**, 253

Secondary circulatory system:
Contribution to acid–base regulation in trout (ISHIMATSU, IWAMA, BENTLEY AND HEISLER) **170**, 43

Secretion:
Of fluid by Malpighian tubules of the house cricket (COAST, HAYES, KAY AND CHUNG) **162**, 331

Securinine:
Effect on metabolism of anoxic crucian carp (NILSSON) **164**, 243

Sensillum:
Of insects, V-ATPases (GLUCK) **172**, 29

Sensitivity:
Of the eye of the winkle (SEYER) **170**, 57

Sensory integration:
In the behavioural responses of a crayfish to light (FERNÁNDEZ-DE-MIGUEL AND ARÉCHIGA) **164**, 153

Sensory neurone:
From *Aplysia californica* siphon, modulation by conopressin G (MARTÍNEZ-PADRÓN, EDSTROM, WICKHAM AND LUKOWIAK) **171**, 79
Properties of, in the maturing central nervous of a cricket (CHIBA, KÄMPER AND MURPHEY) **164**, 205

***Sepioteuthis lessoniana*:**
Muscle biochemistry (KIER AND SCHACHAT) **168**, 41

***Sepioteuthis sepioidea*:**
Glutamate receptors on the Schwann cell membrane (EVANS, REALE, MERZON AND VILLEGAS) **173**, 229, 251

L-Serine:
Uptake by trout red blood cells (GALLARDO, PLANAS AND SÁNCHEZ) **163**, 85

Serotonin:
Cardiorespiratory effects in trout (FRITSCHE, THOMAS AND PERRY) **173**, 59
Currents evoked in locust neurones (BERMUDEZ, BEADLE AND BENSON) **165**, 43
In giant neurones of *Helix* (VEHOVSKY, KEMENES AND S.-ROZSA) **173**, 109
Utilization of, in the brain of stressed Arctic charr (WINBERG, NILSSON AND OLSÉN) **165**, 229
Sexual maturity:
Induces heart growth in rainbow trout (FRANKLIN AND DAVIE) **171**, 139
Sialylation:
Of mucus glycoproteins in cystic fibrosis (AL-AWQATI, BARASCH AND LANDRY) **172**, 245
Signature:
Specificity in the electric organ discharges of mormyrids (CRAWFORD) **164**, 79
***Silurus glanis*:**
Arterial partial pressure of oxygen (FORGUE, TRUCHOT AND MASSABUAU) **170**, 257
***Siren lacertina*:**
Effect of the hypoxic boundary layer on cutaneous gas exchange (FEDER AND BOOTH) **166**, 237
Skate:
Electrosensory common mode signal suppression (BODZNICK, MONTGOMERY AND BRADLEY) **171**, 107
Skin:
From trout, calcium transport by (MARSHALL, BRYSON AND WOOD) **166**, 297
Of frog, V-ATPases (GLUCK) **172**, 29
Snail:
Achatina fulica, control of rhythmic buccal motor activity (YOSHIDA AND KOBAYASHI) **164**, 117
Serotonergic monosynaptic connections (VEHOVSKY, KEMENES AND S.-ROZSA) **173**, 109
Sodium:
Measurement of, with flexible ion-sensitive electrodes (O'DONNELL) **162**, 353
Sodium channels:
In cultured neurones from embryonic cockroaches (AMAR, PICHON AND INOUE) **163**, 65
Sodium gradient:
Transmembrane, depression of, in a mussel (BØRSETH, AUNAAS, EINARSON, NORDTUG, OLSEN AND ZACHARIASSEN) **169**, 1
Somatostatin:
Role in the control of stomach volume in cod (GROVE AND HOLMGREN) **163**, 33
Role in the control of stomach volume in rainbow trout (GROVE AND HOLMGREN) **163**, 49
Sound:
Production of, by the cicada (BENNET-CLARK AND YOUNG) **173**, 123
Reception of, by the bush cricket (HARTLEY AND STEPHEN) **163**, 359
***Spalax leucodon*:**
Reversed coupling in backward locomotion (EILAM AND SHEFER) **173**, 155
Spawning:
In the male lugworm, induction of (PACEY AND BENTLEY) **173**, 165
Spectral irradiance:
Measured in a salmonid nursery lake (NOVALES-FLAMARIQUE, HENDRY AND HAWRYSHYN) **169**, 121
Speed:
Of a sidewinding snake (SECOR, JAYNE AND BENNETT) **163**, 1
Of swimming blue marlin (BLOCK, BOOTH AND CAREY) **166**, 267
Spermatozoon:
Rotational movement (ISHIJIMA, HAMAGUCHI, NARUSE, ISHIJIMA AND HAMAGUCHI) **163**, 15
Spider:
Coupling between the heart and sucking stomach in feeding tarantulas (DUNLOP, ALTRINGHAM AND MILL) **166**, 83
Vision in *Cupiennius salei* (LAND AND BARTH) **164**, 227
Spinal cord:
Thermosensitivity of, in the pigeon (ØSTNES AND BECH) **162**, 185
Splenectomy:
Effect on swimming performance and haematology of rainbow trout (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
***Spodoptera littoralis*:**
Dietary selection behaviour (SIMMONDS, SIMPSON AND BLANEY) **162**, 73
Sprouting:
Of neurites from cultured leech Retzius cells (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1
***Squalus acanthias*:**
Gut blood flow (HOLMGREN, AXELSSON AND FARRELL) **168**, 161

Squid:
Function of the olfactory organ (GILLY AND LUCERO) **162**, 209
Glutamate receptors on a squid Schwann cell membrane (EVANS, REALE, MERZON AND VILLEGAS) **173**, 229, 251
Muscle biochemistry (KIER AND SCHACHAT) **168**, 41
Stimulation of olfactory receptor cells (LUCERO, HORRIGAN AND GILLY) **162**, 231
Stanniocalcin:
Secretion of, in the eel (HANSSEN, MAYER-GOSTAN, FLIK AND WENDELAAR BONGA) **162**, 197
Starling:
Pectoralis muscle force and power output during flight (BIEWENER, DIAL AND GOSLOW) **164**, 1
Starvation:
Effect on brain serotonin in Arctic charr (WINBERG, NILSSON AND OLSÉN) **165**, 229
Steering:
During the tail-flip in the spiny lobster (NEWLAND, CATTAERT, NEIL AND CLARAC) **164**, 261
Of flying crickets in response to ultrasound (MILES, MAY, HOLBROOK AND HOY) **169**, 19
***Stenotomus chrysops*:**
Effect of temperature on muscle power output (ROME AND SWANK) **171**, 261
Influence of temperature on muscle function during swimming (ROME, CHOI, LUTZ AND SOSNICKI) **163**, 259; (ROME, SOSNICKI AND CHOI) **163**, 281
Stepping:
Sequence of, in the mole rat (EILAM AND SHEFER) **173**, 155
***Sterna albifrons*:**
Optimization of flight speed (WAKELING AND HODGSON) **169**, 261
***Sterna hirundo*:**
Optimization of flight speed (WAKELING AND HODGSON) **169**, 261
***Sterna sandvicensis*:**
Optimization of flight speed (WAKELING AND HODGSON) **169**, 261
***Steropleurus ortegai*:**
Sound reception (HARTLEY AND STEPHEN) **163**, 359
Stick insect:
Functional specialization in the femoral chordotonal organ (KITTMANN AND SCHMITZ) **173**, 91
Stiffness:
In marlin intervertebral joints (LONG) **162**, 131
Of the locust tibia (KATZ AND GOSLINE) **168**, 125
Stolon:
Contraction of, in hydroids (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Stomach:
Volume control in cod (GROVE AND HOLMGREN) **163**, 33
Volume control in rainbow trout (GROVE AND HOLMGREN) **163**, 49
Stomatogastric system:
In a lobster, rhythmic motor output (REZER AND MOULINS) **163**, 209
Stomatopod:
Visual tracking in *Gonodactylus oerstedii* (CRONIN, YAN AND BIDLE) **171**, 373
Strain:
In bone, relationship with mechanics (LOITZ AND ZERNICKE) **170**, 1
On the equine hoof wall (THOMASON, BIEWENER AND BERTRAM) **166**, 145
Stress:
Effect on brain serotonin in Arctic charr (WINBERG, NILSSON AND OLSÉN) **165**, 229
Stretch receptors:
Input to leg motoneurones in a crab (HEAD AND BUSH) **163**, 187
Role in postural reflexes in a lobster (SUKHDEO AND PAGE) **162**, 167
Stretch-activation:
Of a cation channel from goby intestine (CHANG AND LORETZ) **169**, 87
Of flight muscle from insects (PECKHAM, CRIPPS, WHITE AND BULLARD) **168**, 57
Stride frequency:
Mechanical work rate minimization during walking (MINETTI AND SAIBENE) **170**, 19
Stroke volume:
Of diving emperor penguins (KOOYMAN, PONGANIS, CASTELLINI, PONGANIS, PONGANIS, THORSON, ECKERT AND LEMAHO) **165**, 161
Structure:
Of mammalian V-ATPases (NELSON) **172**, 149
Of plant V-ATPases (TAIZ) **172**, 113
Of the F_o complex of *Escherichia coli* F-ATPase (DECKERS-HEBESTREIT AND ALTENDORF) **172**, 451
Of V-ATPase from coated vesicles (FORGAC) **172**, 155
Of V-ATPases (NELSON) **172**, 19

Sturgeon:
Effects of diet on responses to hypoxia (RANDALL, McKENZIE, ABRAMI, BONDIOLOTTI, NATIELLO, BRONZI, BOLIS AND AGRADI) **170**, 113
***Sturnus vulgaris*:**
Pectoralis force and power output during flight (BIEWENER, DIAL AND GOSLOW) **164**, 1
Substance P:
As a vasodilator in mosquito saliva (RIBIERO) **165**, 73
Effect on blood flow to the dogfish gut (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Subunit:
Organization of, in plant V-ATPase (SZE, WARD, LAI AND PERERA) **172**, 123
Sucking stomach:
Coupling to the heart in feeding tarantulas (DUNLOP, ALTRINGHAM AND MILL) **166**, 83
Sugar:
A stimulus for the frog taste cell (OKADA, MIYAMOTO AND SATO) **162**, 23
Superoxide radical:
Production in a sea anemone and its endosymbiotic algae (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
Surface tension:
In the blind-ending capillary tubes of soldier crab lungs (MAITLAND AND MAITLAND) **163**, 333
Surround inhibition:
In the butterfly visual system (ICHIKAWA) **171**, 247
Swimbladder:
Function in buoyancy regulation in the killifish (GOOLISH) **166**, 61
In the eel, blood perfusion and gas exchange (PELSTER AND SCHEID) **173**, 205
Swimmeret rhythm:
Control of, in crayfish (CATTAERT, BARTHE, NEIL AND CLARAC) **169**, 181
Swimming:
Blood flow distribution in diving ducks (STEPHENSON AND JONES) **166**, 285
Cardiac output and blood flow distribution in the tufted duck (BEVAN AND BUTLER) **168**, 199
Effect of hypergravity on *Paramecium* (OOYA, MOGAMI, IZUMI-KUROTANI AND BABA) **163**, 153
Effect of splenectomy on performance of rainbow trout (GALLAUGHER, AXELSSON AND FARRELL) **171**, 301
Effect of temperature and low pH on performance of brown trout (BUTLER, DAY AND NAMBA) **165**, 195
Effect of temperature on performance of fish larvae (BATTY AND BLAXTER) **170**, 187
Effects of cerebellar lesions in trout (ROBERTS, VAN ROSSEM AND DE JAGER) **167**, 171
Heart rate and oxygen consumption in sea lions (BUTLER, WOAKES, BOYD AND KANATOUS) **170**, 35
In chicks, kinematics (JOHNSTON AND BEKOFF) **171**, 43
Influence of temperature on muscle function in the scup (ROME, CHOI, LUTZ AND SOSNICKI) **163**, 259; (ROME, SOSNICKI AND CHOI) **163**, 281
Interneurones mediating the escape reaction of a pteropod mollusc (ARSHAVSKY, DELIAGINA, ORLOVSKY, PANCHIN AND POPOVA) **164**, 307
Power output of salmon (TANG AND WARDLE) **166**, 33
Repeatable performances of individual largemouth bass (KOLOK) **170**, 265
Rotational movement of a spermatozoon (ISHIJIMA, HAMAGUCHI, NARUSE, ISHIJIMA AND HAMAGUCHI) **163**, 15
Sarcomere length changes in fish (LIEBER, RAAB, KASHIN AND EDGERTON) **169**, 251
Scaling of muscle power output in cod (ANDERSON AND JOHNSTON) **170**, 143
Speed and depth of blue marlin (BLOCK, BOOTH AND CAREY) **166**, 267
Steering during the tail-flip in the spiny lobster (NEWLAND, CATTAERT, NEIL AND CLARAC) **164**, 261
Undulatory, friction drag and inertial recoil (WEBB) **162**, 157
Undulatory locomotion of *Sagitta elegans* (JORDAN) **163**, 119
Symbiosis:
Between a sea anemone and an alga, oxyradical production (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
Synaptic rearrangement:
In the central nervous system of a cricket during maturation (CHIBA, KÄMPER AND MURPHEY) **164**, 205
Synaptic transmission:
Graded, in a mollusc visual pathway (NISHI AND GOTOW) **168**, 77
In *Manduca sexta*, decline during metamorphosis (SONEA AND RHEUBEN) **167**, 61

Synaptic vesicles:
V-ATPase and neurotransmitter transport (MORIYAMA, MAEDA AND FUTAI) **172**, 171

Tachykinin:
As a vasodilator in mosquito saliva (RIBIERO) **165**, 73

Tail-flip:
Steering reactions in the spiny lobster (NEWLAND, CATTAERT, NEIL AND CLARAC) **164**, 261

Tarantula:
Coupling between the heart and sucking stomach during ingestion (DUNLOP, ALTRINGHAM AND MILL) **166**, 83

Taste:
Nutrient feedback mechanisms in the locust (SIMPSON AND ABISGOLD) **168**, 269

Taste cell:
In frog, receptor potential induced by sugar (OKADA, MIYAMOTO AND SATO) **162**, 23

Telemetry:
Used to study swimming speeds and depths of blue marlin (BLOCK, BOOTH AND CAREY) **166**, 267

***Teleogryllus oceanicus*:**
Phonotactic response (MILES, MAY, HOLBROOK AND HOY) **169**, 19

Teleost:
Branchial blood flow in cod (SUNDIN AND NILSSON) **165**, 73
Scaling of muscle power output in cod (ANDERSON AND JOHNSTON) **170**, 143

Teleost intestine:
Stretch-activated cation channel (CHANG AND LORETZ) **169**, 87

Temperature:
Effect on cardiovascular variables of antarctic fish (AXELSSON, DAVISON, FORSTER AND FARRELL) **167**, 179
Effect on muscle function in swimming scup (ROME, CHOI, LUTZ AND SOSNICKI) **163**, 259; (ROME, SOSNICKI AND CHOI) **163**, 281
Effect on power output of scup red muscle (ROME AND SWANK) **171**, 261
Effect on swimming performance of brown trout (BUTLER, DAY AND NAMBA) **165**, 195
Effect on swimming performance of fish larvae (BATTY AND BLAXTER) **170**, 187
Effect on swimming performance of individual largemouth bass (KOLOK) **170**, 265
Effect on the force–frequency relationship of trout myocardium (HOVE-MADSEN) **167**, 47
Effects on diving tufted ducks (BEVAN AND BUTLER) **163**, 139

Temperature acclimation:
Effect on function of carp heart (MATIKAINEN AND VORNANEN) **167**, 203

Temperature sensor:
In the stomach of seabirds (WILSON, COOPER AND PLÖTZ) **167**, 267

Tern:
Optimization of flight speed (WAKELING AND HODGSON) **169**, 261

Terrestrial locomotion:
Role of the body axis in a salamander (FROLICH AND BIEWENER) **162**, 107

Tettigoniidae:
Can bush crickets discriminate frequency? (HARTLEY AND STEPHEN) **163**, 359

Thermal conductance:
In the pigeon spinal cord (ØSTNES AND BECH) **162**, 185

Thermal resistance:
Of the body of a quail (ZERBA AND WALSBERG) **171**, 409

Thermoaccumulation:
In *Paramecium caudatum* (TOMINAGA AND NAITOH) **164**, 39

Thermoreceptor potential:
In *Paramecium caudatum* (TOMINAGA AND NAITOH) **164**, 39

Thermoregulation:
By a quail (ZERBA AND WALSBERG) **171**, 409
In the pigeon (ØSTNES AND BECH) **162**, 185

Thermosensitivity:
Of the spinal cord of the pigeon (ØSTNES AND BECH) **162**, 185

Tilapia:
Na^+/Ca^{2+} exchangers in enterocyte basolateral plasma membranes (SCHOENMAKERS AND FLIK) **168**, 151

Tissue culture:
Neurite retraction after electrical activity in leech Retzius cells (GRUMBACHER-REINERT AND NICHOLLS) **167**, 1

Toad:
Acid–base regulation (GARLAND AND TOEWS) **170**, 271
Lymph heart pressure, rate and flow (JONES, WENTZELL AND TOEWS) **169**, 207

Tongue:
Displacements of, in a feeding lizard (DELHEUSY AND BELS) **170**, 155
Mechanism of projection, in chameleons (WAINWRIGHT AND BENNETT) **168**, 1, 23
Protraction of, during prey capture by a tree frog (DEBAN AND NISHIKAWA) **170**, 235

Toxicity:
Of ammonia for rainbow trout (WILSON AND TAYLOR) **166**, 95
***Trachemys scripta elegans*:**
Freeze tolerance (CHURCHILL AND STOREY) **167**, 221
Training:
Of ducks to dive for particular durations (BEVAN, KEIJER AND BUTLER) **162**, 91
Of pigeons, to discriminate geomagnetic fields (COUVILLON, ASAM AND BITTERMAN) **173**, 295
Transient sound:
In the call of the bush cricket (HARTLEY AND STEPHEN) **163**, 359
Translational control:
Of dormancy, in *Artemia franciscana* (HOFMANN AND HAND) **164**, 103
Transmembrane voltage:
Role in V-ATPase-coupled ion movements (MARTIN) **172**, 387
Transmitter release:
At motor terminals, in *Drosophila* (GHO AND GANETZKY) **170**, 93
Transport:
Intracellular, regulation of (SLAYMAN) **172**, 267
Of amino acids by trout hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
Of calcium, in yeast tonoplast and plasma membrane (BERTL AND SLAYMAN) **172**, 271
Of glycine across insect midgut (HANOZET, SACCHI, NEDERGAARD, BONFANTI, MAGAGNIN AND GIORDANA) **162**, 281
Of ions and fluids in insect Malpighian tubules (MADDRELL AND O'DONNELL) **172**, 417
Of protons, by the F-ATPase from *Escherichia coli* (FUTAI, IWAMOTO, OMOTE, ORITA, SHIN, NAKAMOTO AND MAEDA) **172**, 443
Of taurine, across the gill of a mussel (SILVA AND WRIGHT) **162**, 265
Treadmill:
Used to study the effects of exercise on a crab (HAMILTON AND HOULIHAN) **162**, 37
Tree frog:
Kinematics of prey capture and tongue protraction (DEBAN AND NISHIKAWA) **170**, 235
Tritiated water:
Fluxes through the pronotum of *Periplaneta americana* (MACHIN, KESTLER AND LAMPERT) **171**, 395
Troponin-H:
In flight muscle of insects (PECKHAM, CRIPPS, WHITE AND BULLARD) **168**, 57
Trout:
Dimensional analysis of the ventricle using echocardiography (FRANKLIN AND DAVIE) **166**, 47
Effects of cerebellar lesions on swimming performance (ROBERTS, VAN ROSSEM AND DE JAGER) **167**, 171
Metabolism of alanine by hepatocytes (CANALS, GALLARDO, BLASCO AND SÁNCHEZ) **169**, 37
Salmo trutta, effect of isoproterenol on serine uptake by red blood cells (GALLARDO, PLANAS AND SÁNCHEZ) **163**, 85
Salmo trutta, swimming performance (BUTLER, DAY AND NAMBA) **165**, 195
Tsetse:
Neural regulation of pupariation (ŽĎÁREK AND DENLINGER) **173**, 11
Tufted duck:
Aythya fuligula, effects of temperature on diving (BEVAN AND BUTLER) **163**, 139
Cardiovascular changes during voluntary diving (BEVAN AND BUTLER) **168**, 199
Heart rate and oxygen consumption during diving (BEVAN, KEIJER AND BUTLER) **162**, 91
Turtle:
Chelonia mydas, orientation of hatchlings to waves (LOHMANN AND LOHMANN) **171**, 1
Chelydra serpentina, kinematics of aquatic prey capture (LAUDER AND PRENDERGAST) **164**, 55
Freeze tolerance (CHURCHILL AND STOREY) **167**, 221
Pseudemys scripta, anoxic survival (NILSSON AND LUTZ) **162**, 345
Tympanum:
Role in sound production by male cicadas (BENNET-CLARK AND YOUNG) **173**, 123
Ultrasound:
Phonotactic response of crickets (MILES, MAY, HOLBROOK AND HOY) **169**, 19
Produced by flying bats (LANCASTER, KEATING AND HENSON) **173**, 43
Used to measure trout cardiac performance (FRANKLIN AND DAVIE) **166**, 47
Ultrastructure:
Degenerative changes in muscle fibres during metamorphosis (RHEUBEN) **167**, 91

Of neuromuscular junctions during metamorphosis (RHEUBEN) **167**, 119
Of vacuoles in hydroid stolons (SCHIERWATER, PIEKOS AND BUSS) **162**, 1
Ultraviolet light:
Measured in a salmonid nursery lake (NOVALES-FLAMARIQUE, HENDRY AND HAWRYSHYN) **169**, 121
Urate:
Effect on lobster haemocyanin oxygen-affinity (ZEIS, NIES, BRIDGES AND GRIESHABER) **168**, 93; (NIES, ZEIS, BRIDGES AND GRIESHABER) **168**, 111
Urinary bladder:
In trout, role in ion regulation (CURTIS AND WOOD) **173**, 181
Urine:
Composition of, in trout infused with NaCl or $NaHCO_3$ (CURTIS AND WOOD) **173**, 181
***Urticina felina*:**
Actions of Antho-RNamide on muscle (McFARLANE, REINSCHEID AND GRIMMELIKHUIJZEN) **164**, 295

Vacuolar transport:
In yeast, modulation of (BERTL AND SLAYMAN) **172**, 271
Vacuolar-type ATPase:
From the midgut of *Manduca sexta*, reaction with DCCD (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **165**, 273
In insect cation-transporting plasma membranes (RUSSELL, KLEIN, REUVENI, SPAETH, WOLFERSBERGER AND HARVEY) **166**, 131
Vacuole:
Biogenesis of V-ATPase in yeast (KANE) **172**, 93
In fungi, V-ATPase (STEVENS) **172**, 47
In yeast, V-ATPase structure (MANOLSON, PROTEAU AND JONES) **172**, 105
Of plants, V-ATPases (TAIZ) **172**, 113
Role of V-ATPase in cystic fibrosis (AL-AWQATI, BARASCH AND LANDRY) **172**, 245
V-ATPase in plants (SZE, WARD, LAI AND PERERA) **172**, 123
Vanadate:
Sensitivity to, of osteoclast V-ATPase (CHATTERJEE, CHAKRABORTY, LEIT, NEFF, JAMSA-KELLOKUMPU, FUCHS, BARTKIEWICZ, HERNANDO AND BARON) **172**, 193
Vasoactive intestinal polypeptide:
Effect on blood flow to the dogfish gut (HOLMGREN, AXELSSON AND FARRELL) **168**, 161
Role in the control of stomach volume in cod (GROVE AND HOLMGREN) **163**, 33
Role in the control of stomach volume in rainbow trout (GROVE AND HOLMGREN) **163**, 49
V-ATPase:
Binding of FSBA (ZHENG, SPAETH, HARVEY AND WOLFERSBERGER) **164**, 301
Electrogenic, integrative functions (SLAYMAN) **172**, 267
Evidence for a conserved 95–120 kDa subunit (MANOLSON, PROTEAU AND JONES) **172**, 105
In fungal vacuoles (STEVENS) **172**, 47
In the fungal vacuole (BOWMAN, DSCHIDA AND BOWMAN) **172**, 57
Molecular biology and evolution (NELSON) **172**, 19
Of plant vacuoles (TAIZ) **172**, 113
Of yeast, biogenesis of (KANE) **172**, 93
Of yeast, molecular genetics (ANRAKU, HIRATA, WADA AND OHYA) **172**, 67
Physiology of (HARVEY) **172**, 1
Ventilation:
Discontinuous, in the ant, mass loss (LIGHTON) **173**, 289
During hypothermia in pigeons (JENSEN AND BECH) **165**, 111
In trout, effects of serotonin (FRITSCHE, THOMAS AND PERRY) **173**, 59
Of frog and salamander in unstirred hypoxic water (FEDER AND BOOTH) **166**, 237
Reversal of, in a mangrove crab (WILKENS AND YOUNG) **163**, 297
Scaling of, in mammals (YOUNG, WARREN AND ALTRINGHAM) **164**, 283
Synchronization with running in horses (YOUNG, ALEXANDER, WOAKES, BUTLER AND ANDERSON) **166**, 19
Ventricle:
Relative mass increases in sexually mature rainbow trout (FRANKLIN AND DAVIE) **171**, 139
Ventricular volume:
End-diastolic and end-systolic, in trout heart (FRANKLIN AND DAVIE) **166**, 47
Viability:
Of brine shrimp embryos, effect of anoxia (CLEGG) **169**, 255
Vision:
Behavioural responses to light in a crayfish (FERNÁNDEZ-DE-MIGUEL AND ARÉCHIGA) **164**, 153
Colour discrimination by a mollusc (NISHI AND GOTOW) **168**, 77

Control of impulse discharge by the receptive field surround (ICHIKAWA) **171**, 247
Perception of the visual flow field by flying locusts (BAADER, SCHÄFER AND ROWELL) **165**, 137
Quality of, in a ctenid spider (LAND AND BARTH) **164**, 227
Regional specialization in stomatopod eyes (CRONIN, YAN AND BIDLE) **171**, 373
Vitamin E:
In the diet, effects on responses of sturgeon to hypoxia (RANDALL, MCKENZIE, ABRAMI, BONDIOLOTTI, NATIELLO, BRONZI, BOLIS AND AGRADI) **170**, 113
***VMA* genes:**
Of yeast, characterization of (ANRAKU, HIRATA, WADA AND OHYA) **172**, 67
Voltage-clamp:
Used to study ion currents in *Manduca sexta* motoneurones (HAYASHI AND LEVINE) **171**, 15
Used to study voltage-activated currents in *Ascaris suum* muscle (MARTIN, THORN, GRATION AND HARROW) **173**, 75
Vortex wake:
Formed by tethered flying green lacewings (GRODNITSKY AND MOROZOV) **169**, 143
***Vorticella*:**
Mechanosensory mechanism for evoking cellular contraction (KATOH AND NAITOH) **168**, 253
V-PPase:
Of plant vacuoles (TAIZ) **172**, 113

Walking:
Escape behaviour of tethered crickets (GRAS AND HÖRNER) **171**, 189
In chicks, kinematics (JOHNSTON AND BEKOFF) **171**, 43
Neurophysiology of escape behaviour in the cricket (HÖRNER) **171**, 215
Of a shore crab in its two natural environments (HUI) **165**, 213
Stride-frequency model (MINETTI AND SAIBENE) **170**, 19
Wandering albatross:
Stomach temperature during feeding (WILSON, COOPER AND PLÖTZ) **167**, 267
Water:
Loss during discontinuous ventilation in the ant (LIGHTON) **173**, 289
Permeability to, of the pronotum of *Periplaneta americana* (MACHIN, KESTLER AND LAMPERT) **171**, 395
Water salinity:
Effect on the response of cod to hypoxia (CLAIREAUX AND DUTIL) **163**, 97
Water vapour:
Absorption of, by *Porcellio scaber* (WRIGHT AND O'DONNELL) **164**, 189
Waves:
Orientation to, of hatchling sea turtles (LOHMANN AND LOHMANN) **171**, 1
Weightlessness:
Effect on swimbladder function in the killifish (GOOLISH) **166**, 61
Weight support:
In chick locomotion (JOHNSTON AND BEKOFF) **171**, 43
Wind:
Escape response to, of tethered crickets (GRAS AND HÖRNER) **171**, 189
Wind tunnel:
Used to measure profile drag of a hawk's wing (PENNYCUICK, HEINE, KIRKPATRICK AND FULLER) **165**, 1
Used to study gliding flight in a hawk (TUCKER) **165**, 21
Wing:
Of a hawk, profile drag (PENNYCUICK, HEINE, KIRKPATRICK AND FULLER) **165**, 1
Wing-beat frequency:
In the locust, effect of temperature (FOSTER AND ROBERTSON) **162**, 295
Of terns (WAKELING AND HODGSON) **169**, 261
Wing movements:
Of flying locusts (ROBERTSON AND REYE) **163**, 231
Winkle:
Resolution and sensitivity of the eye (SEYER) **170**, 57
Winter flounder:
Skin acts as a barrier to ice crystal propagation (VALERIO, KAO AND FLETCHER) **164**, 135
Work:
Minimization of, during walking (MINETTI AND SAIBENE) **170**, 19
Oscillatory, in cod fast muscle (ANDERSON AND JOHNSTON) **170**, 143

***Xenopus laevis*:**
Effect of the hypoxic boundary layer on cutaneous gas exchange (FEDER AND BOOTH) **166**, 237

Stopping response of the embryo (BOOTHBY AND ROBERTS) **169**, 65

Yeast:
A conserved 95–120 kDa subunit essential for V-ATPase activity (MANOLSON, PROTEAU AND JONES) **172**, 105
Biogenesis of V-ATPase (KANE) **172**, 93
Effect of V-ATPase mutations on localization of vacuolar proteins (KLIONSKY, NELSON, NELSON AND YAVER) **172**, 83
Patch-clamp studies on cation channels (BERTL AND SLAYMAN) **172**, 271

***Zalophus californianus*:**
Heart rate and oxygen consumption during swimming (BUTLER, WOAKES, BOYD AND KANATOUS) **170**, 35

Zinc sulphate:
Effect of intranasal irrigation on homing performance of pigeons (SCHLUND) **164**, 171

***Zoarces viviparus*:**
Amino acid uptake and metabolism of embryos (KORSGAARD) **171**, 315

Zooxanthellae:
Production of oxyradicals by (DYKENS, SHICK, BENOIT, BUETTNER AND WINSTON) **168**, 219
